## Exploring the FendX strategic vision for products focused on infectious disease control with Dr. Carolyn Myers

written by InvestorNews | September 1, 2023 In a recent interview with Investor.News host Tracy Weslosky, <u>FendX Technologies Inc.</u>'s (CSE: FNDX | OTCQB: FDXTF) President, CEO, and Director Dr. Carolyn Myers delves into two pioneering product streams that underscore FendX's commitment to infectious disease control.

The REPELWRAP<sup>™</sup> surface coating film acts as a powerful shield that repels pathogens such as bacteria and viruses, significantly reducing transmission. Dr. Myers discusses how this nanotechnology holds significant promise for high-traffic industries such as healthcare, schools, and transportation. Further, FendX is developing a spray nanotechnology, which promises even more convenient applications. With the potential to expand into various sectors, this spray-based innovation presents a wider market potential.

Discussing FendX's formidable and exceptionally well-qualified management team, Dr. Myers emphasized FendX's strategic vision for expansion through mergers and acquisitions (M&A). Drawing from her wealth of experience, she stressed the pivotal role of M&A in scaling the company's impact. As FendX focuses on both internal product development and external growth opportunities, the FendX umbrella of infectious disease control reveals a broad landscape of applications waiting to be explored. ## About FendX Technologies Inc.

FendX is a Canada-based nanotechnology company focused on developing products to make people's lives safer by reducing the spread of pathogens. The Company is developing both film and spray products to protect surfaces from contamination. The lead product under development, REPELWRAP<sup>™</sup> film, is a protective surface coating film that, due to its repelling properties, prevents the adhesion of pathogens and reduces their transmission on surfaces prone to contamination. The spray nanotechnology is a bifunctional spray coating being developed to reduce contamination on surfaces by repelling and killing pathogens. The Company is conducting research and development activities using its nanotechnology in collaboration with industry-leading partners, including McMaster University. The Company has an exclusive worldwide license to its technology and IP portfolio from McMaster, which encompass both film and spray coating nanotechnology formulations.
