# American Tungsten's Murray Nye to Spotlight "Tungsten in Canada/USA" at CMI Summit IV

written by InvestorNews | May 9, 2025

TORONTO, ONTARIO – May 9, 2025 – The Critical Minerals Institute (CMI) is pleased to announce that Murray Nye, President of American Tungsten Corp. (CSE: TUNG | OTCQB: DEMRF), will present "Tungsten in Canada/USA" on Day 1 of CMI Summit IV, Tuesday, May 13 (1:20 – 1:35 PM ET). He will also participate that afternoon on Panel 04, "The Surge in Demand for Military Metals" (3:10 – 3:55 PM ET).

With more than two decades of building public-company ventures in the resource sector, Nye now steers American Tungsten's strategy to reactivate the historic IMA Mine in Idaho while expanding the Company's North American tungsten footprint. Since assuming the presidency in April 2025, he has enlarged the IMA land package by nearly 2,000 acres, overseen the Company's re-branding from Demesne Resources, and brought veteran defense sector talent onto the board to fast-track U.S. government engagement.

During his 15-minute address, Nye will outline how tungsten forms the metallurgical backbone of hard-power supply chains—from armour-piercing penetrators to high-temperature superalloys—and why on-shoring this critical mineral is now a national security imperative. Delegates will gain an inside look at permitting milestones, defense sector procurement pathways, and the cost-compression benefits of establishing an integrated tungsten processing corridor within Canada and the United States.

“America cannot afford to rely on foreign sources of critical minerals like tungsten,” Nye says. “By bringing the past-producing IMA Mine back online and pursuing additional North American resources, we aim to anchor a secure, tariff-free metals complex that directly serves defense and high-tech manufacturers across the continent.”

Tracy Hughes, Founder & Executive Director of CMI, commented:

“Few leaders grasp the strategic urgency and commercial mechanics of rebuilding North America’s defense metal supply chains the way Murray does. His cross-border tungsten blueprint is exactly the kind of actionable solution CMI Summit IV is designed to showcase.”

CMI Summit IV will convene industry executives, policymakers, and capital-market leaders under the theme “The War for Critical Minerals and Capital Resources.” For registration and the full agenda, visit CriticalMineralSummit.com.

**CMI Summit IV Event Details**

**Theme:** *The War for Critical Minerals and Capital Resources*
**Dates:** Tuesday & Wednesday, **May 13–14, 2025**
**Summit Hours: 8:30 AM – 5:00 PM ET**
*Registration & coffee:* 7:30 – 8:30 AM
**Reception:** Tuesday, May 13, 5:00 – 6:30 PM – hosted by **ArcStone Securities and Investment Corp.**
**Location:** The National Club, 303 Bay Street, Toronto, Ontario, Canada

**About American Tungsten Corp.**

American Tungsten Corp. (CSE: TUNG | OTCQB: DEMRF | FSE: RK9) is

a Canadian critical-minerals company working to rebuild a secure North American supply of defence metals. Its flagship asset, the past-producing IMA Mine Project in Lemhi County, Idaho, gives the company an option to earn 100 % ownership of a high-grade tungsten deposit with historical underground infrastructure. Complementing IMA, American Tungsten holds the 4,615-hectare Star magnetite project in British Columbia's Skeena Mining Division. By integrating these two assets, the company aims to supply tungsten concentrates and magnetite feedstock for armour-steel, heavy-alloy, and advanced magnet applications. Headquartered in Vancouver, American Tungsten is led by a board and management team with deep experience in capital markets, exploration, and U.S. defence-sector engagement.

**About the Critical Minerals Institute**

The Critical Minerals Institute (CMI) is a trusted global leader in connecting companies, capital markets, and experts in the critical minerals industry. By combining in-depth research, thought leadership, and extensive industry expertise, CMI provides exclusive insights, invaluable resources, and robust networking opportunities that empower its members to thrive in a rapidly evolving global marketplace. Through collaboration with businesses, governments, and other stakeholders, CMI addresses both the challenges and opportunities within the critical minerals sector, highlighting the value, sustainability, and strategic importance of these essential materials. As a result, CMI ensures its members are equipped to drive innovation, lead in cutting-edge technology, and fuel industrial advancement worldwide.
