

Lithium Ionic's Blake Hylands on Advancing Lithium Production in Brazil

written by InvestorNews | November 2, 2023

In a recent InvestorNews interview, host Tracy Weslosky sat down with Blake Hylands, CEO and Director of [Lithium Ionic Corp.](#) (TSXV: LTH | OTCQX: LTHCF), to discuss Lithium Ionic's progress in moving its projects towards production within Brazil's Minas Gerais state, a mining-friendly jurisdiction that is quickly emerging as a world-class hard-rock lithium district.

Blake goes on to discuss Lithium Ionic's recently announced [Preliminary Economic Assessment](#) (PEA) for their Bandeira project, revealing a US\$1.6 billion post-tax Net Present Value (NPV), a 121% Internal Rate of Return (IRR), and an impressive 14-month payback period. Blake believes that lithium prices will continue to rise, contributing to even faster project payback.

Highlighting the continuing supply-demand imbalance, Blake delved into how Lithium Ionic is strategically positioning itself in the global lithium industry. While continuing to drill to expand their resources, Blake highlighted how Lithium Ionic is actively securing permits, power sources, and de-risking their projects to position themselves to enter the production phase faster than its peers.

About Lithium Ionic Corp.

Lithium Ionic is a Canadian mining company exploring and developing its lithium properties in Brazil. Its flagship Itinga and Salinas projects cover 14,182 hectares in the northeastern part of Minas Gerais state, a mining-friendly jurisdiction that is quickly emerging as a world-class hard-rock lithium district. The Itinga Project is situated in the same region as CBL's Cachoeira lithium mine, which has produced lithium for +30 years, as well as Sigma Lithium Corp.'s Grota do Cirilo project, which hosts the largest hard-rock lithium deposit in the Americas.
