

Dr. Francis Dube on the advancement of mask technologies and ZEN's graphene based virucidal ink with 99% efficacy

written by InvestorNews | October 14, 2020

InvestorIntel's Tracy Weslosky speaks with Dr. Francis Dube, CEO and Director of [ZEN Graphene Solutions Ltd.](#) (TSXV: ZEN), about ZEN's novel graphene based virucidal ink. "We have come up with a coating that can be applied to masks and filter membranes to deactivate the COVID-19 virus," Dr. Dube told InvestorIntel. "It has been proven at plus 99% efficacy through Western University's ImPaKT facility which is a Biosafety Level 3 lab."

In an InvestorIntel interview that can also be viewed on our [InvestorIntel YouTube channel](#), Dr. Dube went on to say, while the current mask technologies are only meant to filter out particles, masks sprayed with ZEN's graphene-based virucidal ink remains 99% effective in killing COVID-19 virus even after 35 days.
