

Imperial Mining's Peter Cashin update on building a North American supply chain for scandium and niobium

written by InvestorNews | August 23, 2021

In a recent InvestorIntel interview, Chris Thompson speaks with Peter Cashin, President and CEO of [Imperial Mining Group Ltd.](#) (TSXV: IPG | OTCQB: IMPNF) about Imperial's Crater Lake scandium and rare earths project. Touching on why these critical materials are valuable for an ESG investor to consider in their portfolio, Analyst Chris Thompson asks a wide range of compelling questions from extraction technology to where Imperial Mining is in the process towards building a North American supply chain for scandium.

Starting with an overview on the competitive applications for scandium and niobium, which includes the lightweighting of steel and aluminum for use in the automotive and aerospace sectors, Peter explains that Imperial Mining is anticipating a 43-101 resource estimation on the TG Zone expected in the next few weeks. Highlighting Crater Lake's high-grade surface scandium mineralization and 'very high grades of niobium and tantalum', Peter explains that a strategic marketing effort in conjunction with a sustainable supply source of these critical materials will most assuredly affect the demand.
