

# InvestorTalk Alert: Ali Haji from American Tungsten Corp. to host on Thursday, April 2, 2026, at 9:00 AM EST

written by InvestorNews | April 1, 2026

InvestorNews.com is pleased to announce an upcoming InvestorTalk scheduled for tomorrow, **Thursday, April 2, 2026, at 9:00 AM EST**, featuring **Ali Haji, CEO and Director, [American Tungsten Corp.](#) (CSE: TUNG | OTCQB: TUNGF)**. To participate in this engaging discussion, please email [tracy@investornews.com](mailto:tracy@investornews.com) to **RSVP**.

American Tungsten Corp. is a Canadian exploration company focused on high-potential tungsten and magnetite assets in North America. The Company is advancing the IMA Mine Project in Idaho to commercial production, addressing critical metal scarcity in North America. The Company's IMA Mine Project is a historic and high-quality underground tungsten past-producing property on private-patented land well above the water table with significant infrastructure. The Company holds an exclusive option to acquire full ownership (subject to a 2% royalty) and has expanded its land position with 113 additional federal claims covering nearly 2,000 acres.

In preparation for tomorrow's InvestorTalk, here are some recent news releases from American Tungsten for your review, which are listed below:

- March 25, 2026 – American Tungsten Extends Strike Length of Tungsten Mineralization at IMA Mine, Idaho, US – [click here](#)

- March 18, 2026 – American Tungsten Completes C\$40 Million Bought Deal Financing – [click here](#)
- March 17, 2026 – American Tungsten Completes Strategic Investment in Viking Mines – [click here](#)

We found the March 25<sup>th</sup> news release titled, “*American Tungsten Extends Strike Length of Tungsten Mineralization at IMA Mine, Idaho, US*” particularly noteworthy and here are 5 key data points from it:

- **High-Grade Tungsten-Silver Intercepts** – American Tungsten reported strong drill results including 28.3 ft at 0.39% WO<sub>3</sub> and 1.08 oz/t Ag, with higher-grade intervals up to **1.03% WO<sub>3</sub>**, confirming robust mineralization.
- **Strike and Up-Dip Extension Confirmed** – Drilling from the second D-level station demonstrates continuity of the polymetallic vein system, extending mineralization along strike to the northwest and up-dip from historical workings.
- **Ongoing Drill Program Expansion** – The Company has completed ~7,800 feet across 23 holes and plans additional drilling, including ~2,800 feet on D-level and up to 10,000 feet on Zero level.
- **Advancing Toward Resource Definition** – Current drilling aims to confirm historical mineralization and define a modern, mineable resource, supporting potential restart of underground operations.
- **Past-Producing High-Quality Asset** – The IMA Mine historically produced ~199,449 MTUs of WO<sub>3</sub>, and the Company is advancing it as a strategic North American tungsten project with existing infrastructure.
