

# InvestorTalk Alert: Ali Haji from American Tungsten Corp. to host on Wednesday, October 8, 2025

written by InvestorNews | October 7, 2025

InvestorNews.com is pleased to announce an upcoming InvestorTalk scheduled for tomorrow, Wednesday, October 8, at 9 AM EST, featuring Ali Haji, CEO and Director, [American Tungsten Corp.](#) (CSE: TUNG | OTCQB: TUNGF). To participate in this engaging discussion, please [click here](#)

American Tungsten is a Canadian exploration company focused on high-potential tungsten and magnetite assets in North America. The Company is advancing the Ima Mine Project in Idaho to commercial production, addressing critical metal scarcity in North America. The Company's Ima Mine Project is a historic and high-quality underground tungsten past-producing property on private-patented land well above the water table with significant infrastructure. The Company holds an exclusive option to acquire full ownership (subject to a 2% royalty) and has expanded its land position with 113 additional federal claims covering nearly 2,000 acres. In preparation for tomorrow's InvestorTalk, here are some recent news releases from American Tungsten for your review, which are listed below:

- September 24, 2025 – American Tungsten Advances Rehabilitation Efforts at IMA And Enters into LOI for U.S.-based Offtake – [click here](#)

- September 4, 2025 – American Tungsten Progresses its IMA Mine Rehabilitation – [click here](#)
- August 20, 2025 – American Tungsten Advances Zero Level Rehabilitation at IMA Mine – [click here](#)

We found the September 24 news release titled, “*American Tungsten Advances Rehabilitation Efforts at IMA And Enters into LOI for U.S.-based Offtake*” particularly noteworthy and here are 5 key data points from it:

- **Strategic LOI with Global Tungsten & Powders (GTP):** American Tungsten has entered into a Letter of Intent (LOI) with Global Tungsten & Powders, one of the world’s largest tungsten processors, marking a significant step toward securing a U.S.-based offtake partner for its IMA Mine production.
- **Rehabilitation Progress – 115 Feet Completed:** The Company has successfully rehabilitated 115 feet of the Zero Level access tunnel at the IMA Mine. Work has now reached the main collapsed zone, estimated at roughly 50 feet in length, marking substantial physical progress toward reopening the underground workings.
- **Positive Site Inspection and Safety Validation:** During a site visit (September 15–16, 2025) attended by company management and a Mine Safety and Health Administration (MSHA) inspector, the rehabilitation work was commended for its quality. Radon readings registered zero, confirming a safe working environment inside the tunnel.
- **Near-Term Production Pathway and Funding Secured:** CEO Ali Haji confirmed that the Zero Level tunnel work is approximately 80% complete and that the Company is fully funded for its updated resource definition drilling and technical studies, positioning it for near-term production and a full-scale restart of the IMA Mine.

- **Expanded Land Position and Resource Potential:** The IMA Mine sits on private-patented claims within Idaho's porphyry belt and is being advanced under an exclusive option to acquire full ownership (subject to a 2% royalty). The Company has also expanded its land package by 113 additional federal claims, now covering nearly 2,000 acres with strong tungsten, silver, and molybdenum potential.
