

# InvestorTalk Alert: Barry Baim from West High Yield Resources Ltd. to host on Thursday, May 28, 2026, at 9:00 AM EST

written by InvestorNews | May 27, 2026

InvestorNews.com is pleased to announce an upcoming InvestorTalk scheduled for tomorrow, **Thursday, May 28, 2026, at 9:00 AM EST**, featuring **Barry Baim, Director, [West High Yield Resources Ltd.](#) (TSXV: WHY)**. To participate in this engaging discussion, please email [tracy@investornews.com](mailto:tracy@investornews.com) to **RSVP**.

West High Yield is a publicly traded junior mining exploration and development company founded in 2003 and focused on acquiring, exploring, and developing mineral resource properties in Canada. Its main objective is to advance the Record Ridge critical mineral deposit in British Columbia using green processing methods designed to reduce waste and lower CO2 emissions. The Record Ridge project is located about 10 kilometres southwest of Rossland, British Columbia, and contains approximately 10.6 million tonnes of magnesium. This estimate is based on an independent Preliminary Economic Assessment prepared in accordance with National Instrument 43-101 standards.

In preparation for tomorrow's InvestorTalk, here are some recent news releases from West High Yield Resources for your review, which are listed below:

- May 21, 2026 – West High Yield (W.H.Y.) Resources Ltd. Announces Private Placement Offering – [click here](#)
- May 19, 2026 – West High Yield Resources Receives Draft

Environmental Management Act Permit for Record Ridge Project – [click here](#)

- May 7, 2026 – West High Yield (W.H.Y.) Resources Ltd. Announces Exercise of Options – [click here](#)

We found the May 19<sup>th</sup> news release titled, “*West High Yield Resources Receives Draft Environmental Management Act Permit for Record Ridge Project*” particularly noteworthy and here are 5 key data points from it:

- **Draft EMA Permit Received** – West High Yield received the draft Environmental Management Act permit from the British Columbia Ministry of Environment and Parks for its Record Ridge Industrial Mineral Mine Project.
- **Another Major Permitting Milestone** – The draft EMA permit follows the Mines Act permit received in October 2025 and the draft Highway Access permit received in March 2026, marking continued progress in project permitting.
- **Environmental Scope of Permit** – The draft EMA permit covers key environmental areas including site water management, environmental monitoring, sediment and erosion control, and fugitive dust management.
- **Remaining Permits in Final Review** – The Company said the final Mine Access permit, Water Licence permit, and Occupant Licence to Cut permit are now in the final stages of regulatory review.
- **Pilot Plant and Funding Progress** – West High Yield completed the first major milestone in its downstream processing pilot program, prepared ore feed for leaching, and said it is in advanced stages of evaluating construction and development financing for the project.
