InvestorTalk Alert: Barry Baim from West High Yield (W.H.Y.) Resources Ltd. to host on Wednesday, August 19, 2026, at 9:00 AM EST

written by InvestorNews | August 18, 2026

InvestorNews.com is pleased to announce an upcoming InvestorTalk scheduled for tomorrow, Wednesday, August 19, 2026, at 9:00 AM EST, featuring Barry Baim, Director, West High Yield (W.H.Y.) Resources Ltd. (TSXV: WHY). To participate in this engaging discussion, please click here

West High Yield is a publicly traded junior mining exploration and development company established in 2003, focused on acquiring, exploring and developing mineral resource properties in Canada. Its primary objective is to advance the Record Ridge critical mineral deposit, which contains magnesium, silica and nickel, using green processing techniques designed to minimize waste and CO_2 emissions. Record Ridge is located approximately 10 km southwest of Rossland, British Columbia. According to the independently prepared NI 43-101 Preliminary Economic Assessment by SRK Consulting (Canada) Inc., dated April 18, 2013, the deposit contains a Measured and Indicated mineral resource of 43.0 million tonnes grading 24.61% magnesium, representing approximately 10.6 million metric tonnes of contained magnesium, supporting related technical and permitting work going forward.

In preparation for tomorrow's InvestorTalk, here are some recent news releases from West High Yield for your review, which are listed below:

- July 31, 2026 – West High Yield (W.H.Y.) Resources Ltd. Announces Final Closing of Private Placement – click here
- July 6, 2026 – West High Yield Resources Announces Extension of Current Private Placement Offering – click here
- June 24, 2026 – West High Yield Resources Receives BC Ministry of Transportation and Transit Access Permit for Record Ridge Magnesium Project and Announces Second Tranche Closing of Private Placement – click here

We found the June 24th news release titled, "*West High Yield Resources Receives BC Ministry of Transportation and Transit Access Permit for Record Ridge Magnesium Project and Announces Second Tranche Closing of Private Placement*" particularly noteworthy and here are 5 key data points from it:

- **Access Permit Secured** – West High Yield received a permit from the BC Ministry of Transportation and Transit allowing construction, use and maintenance of access infrastructure for the Record Ridge Industrial Mineral Mine Project.
- **Another Regulatory Step Completed** – The access permit follows the Company's BC Mines Act permit issued in October 2025, adding another required authorization for future site development, construction and operation.
- **Record Ridge Development Work Continues** – West High Yield says it is advancing project planning, detailed engineering, commercialization initiatives, pilot plant testing and remaining regulatory authorizations for Record Ridge.
- **Project Positioned for Construction Access** – The permit authorizes use of a Ministry Right of Way, including the approved highway access intersection and road improvements

needed to support future construction and operations at Record Ridge.

- **Indigenous Partnership Highlighted** – West High Yield acknowledged the continued support of the Osoyoos Indian Band and said it remains committed to advancing the project with OIB and Skemxist Solutions, formed through a partnership between OIB and The Sutherland Group of Companies.
