

InvestorTalk Alert: Christopher Berlet from Canuc Resources Corporation to host on Wednesday, November 26, 2025

written by InvestorNews | November 25, 2025

InvestorNews.com is pleased to announce an upcoming InvestorTalk scheduled for tomorrow, Wednesday, November 26, at 9:00 AM EST, featuring Christopher Berlet, President, CEO, and Director, [Canuc Resources Corporation](#) (TSXV: CDA | OTCQB: CNUCF). To participate in this engaging discussion, please [click here](#)

Canuc Resources is a junior resource company advancing its 100%-owned East Sudbury Project (ESP), a 19,710-hectare property located 20 km northeast of the Sudbury Mining Camp. ESP hosts several centers of critical and precious metal mineralization, including the historic Scadding Gold Mine and Scadding Gold Tailings Project, and is interpreted to be part of an IOCG-style mineral system. The Company also owns the San Javier Silver-Gold Project in Sonora, Mexico, covering 28 claims over 1,052 hectares with silver, gold, and copper mineralization related to a silver-dominant IOCG system. Canuc generates cash flow from natural gas production at its MidTex Energy Project in Central West Texas, where it participates in eight producing wells and potential in-field development. The Company also holds a 4% NSR on gold production from the Scadding Gold Tailings Project.

In preparation for tomorrow's InvestorTalk, here are some recent news releases from Canuc Resources for your review, which are listed below:

- November 11, 2025 – Canuc Announces Seismic Survey on East Sudbury Project (ESP) – [click here](#)
- October 30, 2025 – Canuc Begins Drilling at East Sudbury Project (ESP) – [click here](#)
- October 22, 2025 – Canuc Completes Gold Assay Verification Program at ESP – [click here](#)

We found the November 11th news release titled, “*Canuc Announces Seismic Survey on East Sudbury Project (ESP)*” particularly noteworthy and here are 5 key data points from it:

- **Seismic Survey Commissioned (2026):** Natural Resources Canada has scheduled a seismic survey for early 2026 on the McLaren Lake Fault Zone (MLFZ) within Canuc’s 100%-owned East Sudbury Project.
- **Optiseis to Lead Imaging Work:** Optiseis Solutions Ltd. will conduct the seismic acquisition, commissioned under the Critical Minerals Geoscience and Data Initiative (CMGD).
- **Targeting MIAC and IOCG Systems:** The survey focuses on a known MIAC mineral system to identify IOCG-style signatures and map fluid pathways, faults, fractures, and alteration zones hosting copper, gold, and cobalt.
- **Testing Advanced Geophysical Technology:** The program integrates surface seismic surveys with fiber-optic borehole sensing to evaluate high-resolution subsurface imaging methods.
- **ESP Hosts Multiple IOCG Prospects:** Canuc highlights that the East Sudbury Project contains at least three areas with IOCG and related deposit potential, with follow-up work planned after survey results are delivered.
