

InvestorTalk Alert: Christopher Eager from Resouro Strategic Metals Inc. to host on Tuesday, February 3, 2026

written by InvestorNews | February 2, 2026

InvestorNews.com is pleased to announce an upcoming InvestorTalk scheduled for tomorrow, Tuesday, February 3, 2026, at 9:00 AM EST, featuring Christopher Eager, CEO and Chairman, [Resouro Strategic Metals Inc.](#) (ASX: RAU | TSXV: RSM | OTCQB: RSGOF). To participate in this engaging discussion, please [click here](#)

Resouro Strategic Metals is a Canadian incorporated mineral exploration and development company focused on the discovery and advancement of economic mineral projects in Brazil, including the Tiros Titanium-Rare Earths Project and the Novo Mundo Gold Project. The Tiros project has 28 mineral concessions totalling 497 km² located in the state of Minas Gerais, one of the best infrastructurally developed states of Brazil, 350 km from the state capital of Belo Horizonte. Resouro's Mineral Resource Estimate for the Tiros Project contains 165 million tonne of titanium dioxide and 5.5 million tonne of total rare earths oxides within a Measured and Indicated Resource of 1.4 billion tonne at 12% titanium dioxide and 4,000 ppm of total rare earth oxides.

In preparation for tomorrow's InvestorTalk, here are some recent news releases from Resouro Strategic Metals for your review, which are listed below:

- January 6, 2026 – Resouro Strategic Metals Inc. (ASX:RAU)

- (CVE:RSM) Forthcoming Director Resignation – [click here](#)
- November 27, 2025 – Resouro Selects Flowsheet for Tiros PEA – [click here](#)
 - November 13, 2025 – Resouro Strategic Metals and Rare Earth Technologies Sign MOU for Rare Earth Element Extraction and Processing Collaboration – [click here](#)

We found the November 13, 2025, news release titled, “*Resouro Strategic Metals and Rare Earth Technologies Sign MOU for Rare Earth Element Extraction and Processing Collaboration*” particularly noteworthy and here are 5 key data points from it:

- **Strategic Processing Collaboration** – Resouro has signed a non-binding MOU with Rare Earth Technologies Inc. (RETI) to collaborate on rare earth extraction and separation for ore from Resouro’s Tiros Titanium and Rare Earths Project.
- **Phased Development Approach** – The collaboration follows a three-phase pathway: initial pilot-scale test work, a potential midstream feasibility study linked to Resouro’s PEA/PFS, and a possible full-scale REE processing plant, subject to technical and economic success.
- **High-Grade Feedstock for Testing** – Phase I test work will use near-surface high-grade ore composites averaging ~9,100 ppm TREO and ~23% TiO₂, supplied by Resouro, with RETI applying its proprietary extraction technology at its Cincinnati facility.
- **Pathway to Midstream JV** – Successful test work could lead to a Definitive MOU and the potential formation of a joint venture to develop a mixed rare earth separation facility, initially at RETI’s site and later at Resouro’s planned Campos Altos Critical Metals Park in Brazil.
- **Large-Scale Resource Foundation** – The Tiros Project hosts a Measured and Indicated Resource of 1.4 billion tonnes, containing 165 million tonnes of titanium dioxide and 5.5

million tonnes of total rare earth oxides, providing a substantial long-term feedstock base for downstream and midstream processing strategies.
