

# InvestorTalk Alert: Darren Hazelwood from Panther Metals PLC to host on Tuesday, September 9, 2025

written by InvestorNews | September 8, 2025

[InvestorNews.com](https://InvestorNews.com) is pleased to announce an upcoming InvestorTalk scheduled for tomorrow, Tuesday, September 9<sup>th</sup>, at 9:00 AM EST, featuring Darren Hazelwood, CEO and Director, [Panther Metals PLC](#) (LSE: PALM). To participate in this engaging discussion, please [click here](#)

Panther Metals is focused on the discovery of commercially viable mineral deposits. The Company's operational focus is on established mining jurisdictions with the capacity for project scalability. Drill targets are assessed rapidly utilizing a combination of advanced technologies and extensive geological data to decipher potential commercial viability and act accordingly. Panther's current geological portfolio comprises of three highly prospective properties in Ontario, Canada.

In preparation for tomorrow's InvestorTalk, here are some recent news releases from Panther Metals for your review, which are listed below:

- September 1, 2025 – Panther Metals PLC: Winston Tailings Project Update and Warrant Expiry – [click here](#)
- August 8, 2025 – Panther Metals PLC – Winston: Gold & Critical Mineral Update – [click here](#)
- July 31, 2025 – Panther Metals PLC: Winston Tailings Assays – [click here](#)

We found the September 1<sup>st</sup> news release titled, "*Panther Metals PLC: Winston Tailings Project Update and Warrant Expiry*" particularly noteworthy and here are 5 key data points from it:

- **Recovery Permit Application:** Panther Metals has formally commenced the Application for Recovery of Minerals Permit with the Ontario Ministry of Energy and Mines for the Winston Tailings Project, which contains gold, gallium, silver, zinc, copper, cobalt, and other recoverable minerals.
- **Regulatory Progress:** The Company has completed its Pre-Submission Meeting with the Ministry and will be assigned a dedicated single point of contact to streamline the process. The application follows a five-step pathway, supported by existing environmental monitoring under the active Mine Closure Plan.
- **Drilling and Studies:** A grid drilling program across the tailings storage facility is scheduled to begin in September 2025. This will supply samples for metallurgical testwork, reprocessing optimization studies, and the definition of a compliant Mineral Resource estimate.
- **Infrastructure Advantage:** The Winston site already hosts extensive infrastructure, including 115kV power supply, water treatment facilities, an office, security fencing, road and rail access, and proximity (200 km) to Thunder Bay, reducing development costs and supporting reprocessing operations.
- **Strong Project Economics:** A 2021 Feasibility Study outlined robust economics for the Winston Project, with a pre-tax NPV8% of C\$175.8M, 26% IRR, and projected annual EBITDA of ~C\$67.6M over an 8.5-year mine life, highlighting significant upside potential through reprocessing and exploration.
