InvestorTalk Alert: Guy Bourassa from Scandium Canada Ltd. to host on Tuesday, May 26, 2026, at 9:00 AM EST

written by InvestorNews | May 25, 2026

InvestorNews.com is pleased to announce an upcoming InvestorTalk scheduled for tomorrow, **Tuesday, May 26, 2026, at 9:00 AM EST**, featuring **Guy Bourassa, CEO and Director,** **Scandium Canada Ltd.** **(TSXV: SCD)**. To participate in this engaging discussion, please email tracy@investornew.com to **RSVP**.

Scandium Canada's ultimate goal is to bring the world's leading primary source of scandium into production, enabling the development and commercialization of aluminum-scandium (Al-Sc) alloys. The Company is leveraging its Al-Sc alloys development division and the development of its Crater Lake mining project to meet the growing need for lighter, greener, longer-lasting, high-performance materials. The Company aims to become a market leader in scandium, while committing itself to building a more responsible economy through innovation and agility.

In preparation for tomorrow's InvestorTalk, here are some recent news releases from Scandium Canada for your review, which are listed below:

- May 19, 2026 – Scandium Canada and ALPOMET Establish Collaboration Framework to Develop Scandium-Based Advanced Materials – click here
- May 7, 2026 – Scandium Canada to Take Part in Four Key Industry Events to Advance Commercial Partnerships and

Investor Engagement – [click here]

- April 27, 2026 – Scandium Canada grants 2,100,000 Stock Options at $0.22 Under Shareholder-Approved Plan to its Board members and Management team – [click here]
- March 17, 2026 – Scandium Canada Announces Closing of $17.3 Million Bought Deal Life Offering, Including Full Exercise of Over-Allotment Option – [click here]

We found the May 19th news release titled, "*Scandium Canada and ALPOMET Establish Collaboration Framework to Develop Scandium-Based Advanced Materials*" particularly noteworthy and here are 5 key data points from it:

- **Strategic Collaboration Signed** – Scandium Canada signed an agreement with ALPOMET, a Turkish advanced materials engineering company, to establish a collaboration framework focused on specialty scandium-based alloys for multiple applications, including hydrogen technologies.
- **Broad Technical Workstreams Identified** – The parties intend to evaluate joint R&D across metal powder production, Al-Sc alloy design, additive manufacturing, hydrogen storage applications, and material characterization, creating a broad technical scope for the partnership.
- **Supports Scandium+ Downstream Strategy** – The collaboration combines Scandium+'s aluminum-scandium alloy work with ALPOMET's expertise in ICME-based alloy design and powder atomization, adding technical capability for alloy validation and powder qualification.
- **Additive Manufacturing Opportunity** – Scandium Canada said the partnership is intended to provide an alloy formulation and production alternative for metal powder qualification, a key step for Al-Sc alloys in laser powder

bed fusion (L-PBF) applications.

- **High-Value End Markets Targeted** – The work is aimed at applications where Al-Sc alloys can offer performance advantages, including aerospace structural components and electric motor systems, where lower weight and higher strength are important.
