

InvestorTalk Alert: James Deckelman from Deep Sea Minerals Corp. to host on Wednesday, April 15, 2026, at 9:00 AM EST

written by InvestorNews | April 14, 2026

InvestorNews.com is pleased to announce an upcoming InvestorTalk scheduled for tomorrow, **Wednesday, April 15, 2026, at 9:00 AM EST**, featuring **James Deckelman, CEO, [Deep Sea Minerals Corp.](#)** (CSE: SEAS | OTCQB: DSEAF | FSE: X45). To participate in this engaging discussion, please email tracy@investornews.com to **RSVP**.

Deep Sea Minerals Corp. is a subsea mineral exploration and development company focused on evaluating opportunities to help support future critical mineral supply through the acquisition, exploration, and development of deep-sea mineral assets. Its strategy centers on identifying jurisdictions and geological settings prospective for polymetallic nodule systems, which may contain metals relevant to defense, industrial manufacturing, clean energy infrastructure, advanced electronics, and artificial intelligence-related supply chains. These seabed resources remain a largely undeveloped part of the global mineral supply base and are receiving growing scientific, policy, and regulatory attention. As part of this strategy, the Company has begun early-stage engagement with selected governments and regulatory bodies in the Pacific Ocean region to assess possible pathways for future exploration initiatives under applicable international, national, and environmental frameworks.

In preparation for tomorrow's InvestorTalk, here are some recent news releases from Deep Sea Minerals for your review, which are listed below:

- April 13, 2026 – Deep Sea Minerals Corp. Appoints Dan McConnell as Vice President of Exploration – [click here](#)
- April 8, 2026 – Deep Sea Minerals Corp. Establishes Cook Islands Subsidiary to Advance Concession Application Process – [click here](#)
- April 6, 2026 – Deep Sea Minerals Corp. Appoints Former Department of Energy CFO, John G. Vonglis as Strategic Advisor – [click here](#)
- April 1, 2026 – Deep Sea Minerals Corp. Announces Marketing Engagement – [click here](#)
- March 23, 2026 – Deep Sea Minerals Corp. Submits Application to NOAA Under Deep Seabed Hard Mineral Resources Act – [click here](#)
- March 20, 2026 – Deep Sea Minerals Corp. Submits Response to U.S. Defense Industrial Base Consortium Solicitation for Critical Minerals – [click here](#)

We found the April 8th news release titled, *“Deep Sea Minerals Corp. Establishes Cook Islands Subsidiary to Advance Concession Application Process”* particularly noteworthy, and here are 5 key data points from it:

- **Cook Islands Subsidiary Established** – Deep Sea Minerals has formed a wholly owned subsidiary in the Cook Islands as part of its evaluation of a potential application for exploration rights within the Cook Islands EEZ.
- **Procedural Step Toward Concession Review** – The new subsidiary is intended to support engagement with the Cook Islands Seabed Minerals Authority and other stakeholders

as the Company assesses a possible application pathway.

- **Cook Islands Offers Defined Regulatory Framework** – The Company highlighted that the Cook Islands is one of the few jurisdictions with a dedicated legislative and regulatory framework for seabed minerals, including licensing, environmental management, and stakeholder processes.
- **Focus on Polymetallic Nodules** – The Cook Islands EEZ has been the subject of scientific work on polymetallic nodules containing nickel, cobalt, manganese, and copper, metals relevant to industrial and defense applications.
- **Critical Minerals Supply Chain Relevance** – The Company framed its Cook Islands evaluation within a broader market backdrop of rising demand for nickel, cobalt, manganese, and copper, as governments and industry increasingly focus on supply chain diversification and security for these materials.
