

# InvestorTalk Alert: John Passalacqua from First Phosphate Corp. to host on Wednesday, July 24, 2024

written by Raj Shah | July 23, 2024

InvestorNews is pleased to announce an upcoming InvestorTalk scheduled for tomorrow, Wednesday, July 24th, at 9 AM EST, featuring John Passalacqua, CEO and Director of [First Phosphate Corp.](#) (CSE: PHOS). To participate in this engaging discussion, please [click here](#)

Currently, First Phosphate holds [74,867,570](#) shares outstanding and has a market capitalization of [CAD\\$11,978,812](#).

In preparation for tomorrow's InvestorTalk, here are the three most recent news releases from First Phosphate for your review, which are listed below:

- July 10, 2024 – First Phosphate Confirms Longest High Grade Intersect to Date of 8.9% Igneous Phosphate Across 156 Metres from Surface at Its Begin-lamarche Project in Saguenay-Lac-St-Jean, Quebec, Canada – [click here](#)
- June 11, 2024 – First Phosphate Announces Filing of Final Short Form Base Shelf Prospectus – [click here](#)
- June 10, 2024 – First Phosphate Corp. Welcomes the Addition of Phosphorous to the Critical Minerals List of Canada – [click here](#)

5-Data Points from the most recent news release on July 10, 2024 titled, *First Phosphate Confirms Longest High Grade Intersect to*

*Date of 8.9% Igneous Phosphate Across 156 Metres from Surface at Its Begin-lamarche Project in Saguenay-Lac-St-Jean, Quebec, Canada:*

- **Drill Hole BL-24-95 Achievement:** Drill hole BL-24-95 at the Phosphate Mountain Zone intersected 8.90% P205 over 156.0 meters starting at a surface depth of 6.0 meters, marking the longest high-grade intersect to date.
- **Completion of Drill Program:** First Phosphate Corp. completed its 25,929-meter drill program ahead of schedule on April 29, 2024, with all samples sent to Actlabs for analysis. A 43-101 resource estimate and a Preliminary Economic Assessment (PEA) are expected by the end of fiscal Q4 2024.
- **Phosphate Mountain Zone Results:** Significant intersections include drill hole BL-24-92 with 8.13% P205 over 177.0 meters from 15.0 meters depth, and drill hole BL-24-94 with 11.38% P205 over 99.0 meters from 51.0 meters depth, including 14.56% P205 over 42.7 meters from 89.0 meters depth.
- **Southern Zone Intersections:** Drill hole BL-24-88 intersected 7.18% P205 over 144.0 meters from a depth of 261.0 meters, and drill hole BL-24-89 intersected 5.99% P205 over 112.0 meters from 233.0 meters depth, showing increasing phosphate grades with depth.
- **Phosphate Grades and Widths:** Data from the Phosphate Mountain Zone show grades of over 10% P205 over widths ranging from 7 m to 99 m. The zone has been drilled for a total length of 250 m and is merging with the Northern Zone, which has a 500 m thick phosphate mineralized envelope.
