

InvestorTalk Alert: Kerem Usenmez from Volta Metals Ltd. to host on Wednesday, August 5, 2026, at 9:00 AM EST

written by InvestorNews | August 4, 2026

InvestorNews.com is pleased to announce an upcoming InvestorTalk scheduled for tomorrow, Wednesday, August 5, 2026, at 9:00 AM EST, featuring Kerem Usenmez, President, CEO, and Director, [Volta Metals Ltd.](#) (CSE: VLTA | OTCQB: VOLMF). To participate in this engaging discussion, please [click here](#)

Volta Metals Ltd. is a critical minerals exploration company focused on rare earths, gallium, lithium, cesium and tantalum in Ontario, one of the world's most prolific and emerging hardrock critical minerals districts. The Company owns, has optioned and is exploring a portfolio of projects across these commodities, led by the 4,750-hectare Springer REE Deposit in Sturgeon Falls on the traditional territory of the Nipissing First Nation. Located approximately 70 km east of Sudbury, Springer benefits from direct access via the Trans-Canada Highway and Highway 64, with paved roads, on-site power from the Crystal Falls hydroelectric dam, natural gas pipeline access and Canadian National Railway service all within 8 km of the deposit.

In preparation for tomorrow's InvestorTalk, here are some recent news releases from Volta Metals for your review, which are listed below:

- July 30, 2026 – Volta Metals Announces Closing of Acquisition of Remaining 20% Interest of Its Flagship

Springer Rare Earth and Gallium Deposit and Contiguous Claim – [click here](#)

- July 27, 2026 – Volta Metals Announces DTC Eligibility, Allowing for Electronic Settlement of Trades in the United States – [click here](#)
- July 22, 2026 – Volta Enters Agreement to Acquire Remaining 20% Interest of Its Flagship Springer Rare Earth and Gallium Deposit in Ontario, Canada – [click here](#)
- July 21, 2026 – Volta Extends Land Position at Springer Top-10* North American Rare Earth Deposit; Historical Drilling on New Ground Returns up to 1.97% TREO – Remains Open for Expansion – [click here](#)

We found the July 21st news release titled, *“Volta Extends Land Position at Springer Top-10* North American Rare Earth Deposit; Historical Drilling on New Ground Returns up to 1.97% TREO – Remains Open for Expansion”* particularly noteworthy and here are 5 key data points from it:

- **Springer Land Position Extended** – Volta Metals agreed to acquire an 8.3-hectare mineral claim immediately east of, and contiguous with, its Springer REE and Gallium Deposit near Sturgeon Falls, Ontario.
- **250 Metres of Additional Strike Secured** – The acquisition extends the Springer mineralized system by approximately 250 m further east along strike, beyond the current mineral resource estimate and optimized open pit shell.
- **Historical Drilling Confirms REE Mineralization** – Historical drill hole SL11-07, located on the acquired claim, intersected 0.54% TREO over 36.98 m, including 1.79% TREO over 1.28 m.
- **Further Mineralized Intervals Reported** – Additional SL11-07 intervals included 1.01% TREO over 5.00 m,

including 1.49% TRE0 over 3.00 m, plus 0.67% TRE0 over 15.70 m deeper in the hole.

- **Upcoming Resource Growth Catalyst** – Volta expects the acquired claim to contribute additional tonnage toward its next mineral resource update, while assays from three 2026 drill holes testing the southeast extension remain pending.
