

# InvestorTalk Alert: Kerem Usenmez from Volta Metals Ltd. to host on Wednesday, February 25, 2026, at 9:00 AM EST

written by InvestorNews | February 24, 2026

InvestorNews.com is pleased to announce an upcoming InvestorTalk scheduled for tomorrow, **Wednesday, February 25, 2026, at 9:00 AM EST**, featuring **Kerem Usenmez, President, CEO, and Director from Volta Metals Ltd. (CSE: VLTA)**. To participate in this engaging discussion, please email [tracy@investornews.com](mailto:tracy@investornews.com) to **RSVP**.

**Volta Metals** is a critical mineral exploration company focused on rare earths, gallium, lithium, cesium, and tantalum. It owns, has optioned and is currently exploring a critical minerals portfolio of rare earths, gallium, lithium, cesium, and tantalum projects in Ontario, one of the world's most prolific and emerging hard-rock critical mineral districts.

In preparation for tomorrow's InvestorTalk, here are some recent news releases from **Volta Metals** for your review, which are listed below:

- February 23, 2026 – Volta Reports Major Resource Expansion at Springer REE Deposit, Demonstrating Substantial Growth in Both Indicated & Inferred Categories – [click here](#)
- February 17, 2026 – Volta Initiates Gallium Recovery Study with Laurentian University, Sudbury, Canada – [click here](#)
- February 11, 2026 – Volta Reports Additional High-Grade Gallium Mineralization at Springer REE Project – [click here](#)

We found the February 23<sup>rd</sup> news release titled, *“Volta Reports Major Resource Expansion at Springer REE Deposit, Demonstrating Substantial Growth in Both Indicated & Inferred Categories”* particularly noteworthy and here are 5 key data points from it:

- **Major Resource Expansion** – Volta Metals Ltd. significantly expanded the Mineral Resource Estimate at the Springer Rare Earth Project to 176.1 Mt total, including 56.6 Mt Indicated at 0.70% TREO and 119.5 Mt Inferred at 0.58% TREO.
- **Rapid Growth in Resource Categories** – The update represents a 1,248% increase in Indicated resources and an 841% increase in Inferred resources, highlighting strong deposit growth through recent drilling.
- **Near-Surface High-Grade Core Identified** – The resource includes higher-grade zones near surface, with 11.5 Mt at 1.10% TREO (Indicated) and 3 Mt at 1.16% TREO (Inferred), supporting potential open-pit development.
- **Top-Tier North American REE Asset** – Springer now ranks among the top 10 largest rare earth deposits in North America, with mineralization remaining open in all directions and multiple expansion opportunities identified.
- **Ongoing Growth and Upside Catalysts** – A fully funded 6,000 m drill program is underway, updated metallurgy is in progress, and recent high-grade gallium results are **not yet included** in the resource, offering additional upside potential.
