

InvestorTalk Alert: Marcy Kiesman from Quantum Critical Metals Corp. to host on Thursday, October 2, 2025

written by InvestorNews | October 1, 2025

InvestorNews.com is pleased to announce an upcoming InvestorTalk scheduled for tomorrow, Thursday, October 2, at 9 AM EST, featuring Marcy Kiesman, CEO and Director, [Quantum Critical Metals Corp.](#) (TSXV: LEAP | OTCQB: ATOXF). To participate in this engaging discussion, please [click here](#)

Quantum Critical Metals is a Canadian mineral exploration company focused on advancing critical metals projects that power next-generation technologies. With a growing portfolio of promising assets—including the NMX East Gallium-Rubidium-Cesium Project in Québec, the Discovery Gallium-Rubidium-Cesium and polymetallic project in Québec, the Victory Antimony Project in British Columbia, and the newly acquired Prophecy Germanium-Gallium-Zinc Project in British Columbia, among others, the Company is strategically positioned to support the West's transition to a secure and sustainable critical metals supply.

In preparation for tomorrow's InvestorTalk, here are some recent news releases from Quantum Critical Metals for your review, which are listed below:

- September 22, 2025 – Quantum Completes Initial Airborne Survey at NMX East Project in Quebec – [click here](#)
- September 12, 2025 – Quantum Joins 47G Institute to

Support Critical Mineral Initiatives – [click here](#)

- September 4, 2025 – Quantum Identifies Mica as Key Carrier of Critical Elements at NMX East, Quebec – [click here](#)
- August 25, 2025 – Quantum Expands Victory Antimony Property in Haida Gwaii, BC – [click here](#)

We found the September 22 news release titled, “*Quantum Completes Initial Airborne Survey at NMX East Project in Quebec*” particularly noteworthy and here are 5 key data points from it:

- **Initial Airborne Survey Completed** – Quantum successfully carried out a VLF electromagnetic (EM) and magnetic geophysical survey at its 100%-owned NMX East Project in Northern Québec, validating historical government data and enhancing geological targeting.
- **Nickel-PGE Exploration Potential** – The survey supports the presence of mafic-ultramafic rocks at surface, indicating potential for nickel and platinum group element (PGE) mineralization, in a region that also hosts Power Metallic Mines’ Nisk deposit.
- **Follow-up MAG-TDEM Survey Planned** – Encouraged by the results, Quantum will undertake a high-resolution MAG-TDEM (time domain electromagnetic) survey to improve subsurface modeling and refine drill-ready targets for Ni-PGE exploration.
- **Next-Generation Critical Metals Focus** – The NMX East work is part of Quantum’s broader strategy to advance critical metals projects essential for next-generation technologies, including gallium, rubidium, cesium, antimony, germanium, and zinc.
- **Strategic Québec Portfolio** – Alongside NMX East, Quantum is advancing several Québec-based projects (gallium-rubidium-cesium and polymetallic discoveries) plus new acquisitions in British Columbia, positioning the Company

as a diversified critical metals explorer in Canada.
