InvestorTalk Alert: Mark Wall from American Rare Earths Limited to host on Tuesday, June 23, 2026, at 9:00 AM EST

written by InvestorNews | June 22, 2026

InvestorNews.com is pleased to announce an upcoming InvestorTalk scheduled for tomorrow, Tuesday, June 23, 2026, at 9:00 AM EST, featuring Mark Wall, President & CEO, American Rare Earths Limited (ASX: ARR | OTCQX: ARRNF | ADR: AMRRY). To participate in this engaging discussion, please click here

American Rare Earths is a critical minerals company advancing the Halleck Creek Project in Wyoming through its wholly owned subsidiary, Wyoming Rare (USA) Inc. Halleck Creek is a large rare earth deposit located on Wyoming State land, where the Cowboy State Mine is planned as a cost-efficient open-pit operation in a mining-friendly jurisdiction. The Company plans onsite mineral processing and separation facilities to support domestic rare earth supply for defense, advanced technologies, and economic needs in the United States. As work progresses, the project also offers further potential across both State and Federal lands. American Rare Earths is also focused on environmentally responsible mining and works with U.S. Government-supported research programs on rare earth extraction and processing technologies.

In preparation for tomorrow's InvestorTalk, here are some recent news releases from American Rare Earths for your review, which are listed below:

- June 18, 2026 – American Rare Earths Provides Exploration Update and Outlines 2026-2027 Field Programs Across U.S. Project Portfolio – click here
- May 27, 2026 – American Rare Earths Commences 2026 Drilling at Halleck Creek to Underpin Feasibility Study – click here
- May 13, 2026 – American Rare Earths Appoints BDO as Auditor and Commences Nasdaq Listing Process – click here

We found the June 18th news release titled, "*American Rare Earths Provides Exploration Update and Outlines 2026-2027 Field Programs Across U.S. Project Portfolio*" particularly noteworthy and here are 5 key data points from it:

- **Four U.S. Projects in Motion** – American Rare Earths outlined 2026–2027 work across Halleck Creek, La Paz, Beaver Creek, and Searchlight, covering rare earths, heavy rare earths, and other critical mineral targets.
- **Halleck Creek Drilling Underway** – At the Cowboy State Mine area, ARR has started a 19-hole, 3,050-metre HQ core drilling program to support feasibility-stage work.
- **Assays Now in the Queue** – Five holes have already been drilled at Halleck Creek, with core being processed and dispatched for assay; turnaround is currently expected to take about six weeks.
- **Expansion Roadmap Being Built** – The Whole of Property Development Assessment is continuing through 2026 and covers future development planning across Red Mountain, Overton Mountain, and Bluegrass.
- **Portfolio Reviews Advancing** – ARR is reviewing Beaver Creek's high-grade surface rare earth results, La Paz's broader multi-commodity potential, and Searchlight's heavy rare earth targets near Mountain Pass.
