InvestorTalk Alert: Robin Dunbar from Grid Metals Corp. to host on Tuesday, April 21, 2026, at 9:00 AM EST

written by InvestorNews | April 20, 2026

InvestorNews.com is pleased to announce an upcoming InvestorTalk scheduled for tomorrow, Tuesday, **April 21, 2026, at 9:00 AM EST**, featuring **Robin Dunbar, President, CEO, and Director, Grid Metals Corp. (TSXV: GRDM | OTCQB: MSMGF)**. To participate in this engaging discussion, please email tracy@investornew.com to **RSVP**.

Grid Metals is currently focused on its 100%-owned Falcon West property in southeastern Manitoba, where it is advancing an emerging cesium discovery. Located 110 km east of Winnipeg along the Trans-Canada Highway, Falcon West hosts highly anomalous cesium and lithium mineralization within LCT pegmatites, including the Lucy South dyke, the Company's main exploration target. Grid also holds the Makwa Property, where Teck Resources can earn up to a 70% interest through a CAD$17.3 million option and joint venture agreement. The Mayville Property contains a NI 43-101 compliant open-pit resource of 32 million tonnes grading 0.61% CuEq, while Grid owns 75% of the adjacent Donner lithium-cesium project, which hosts 6.8 million tonnes grading 1.39% Li2O. All projects lie on Sagkeeng First Nation ancestral lands.

In preparation for tomorrow's InvestorTalk, here are some recent news releases from Grid Metals for your review, which are listed below:

- April 15, 2026 – Grid Metals and Boliden Sign $10 Million

Earn-In Agreement for the Thompson East Copper/Nickel Project in Northern Manitoba – click here

- April 1, 2026 – Grid Metals Reports First Assays From Its Phase 2 Drill Program at Falcon West Including 12.9% Cs2O Over 3.8m – click here
- February 26, 2026 – Grid Metals Reports Final Assays from its 2025 Drill Program at Falcon West Including 20.45% Cs20 over 3.3m; Announces Participation at PDAC – click here

We found the April 15th news release titled, "*Grid Metals and Boliden Sign $10 Million Earn-In Agreement for the Thompson East Copper/Nickel Project in Northern Manitoba*" particularly noteworthy and here are 5 key data points from it:

- **$10 Million Earn-In Agreement Signed** – Grid Metals signed a definitive option and joint venture agreement with Boliden Mineral Canada on the Thompson East copper/nickel project in northern Manitoba, with the goal of discovering a Tier 1 magmatic copper-nickel-PGM-cobalt deposit.
- **Boliden Can Earn 80% Interest** – Boliden can earn an 80% interest in Thompson East by funding C$9.6 million in exploration and making C$500,000 in staged cash payments to Grid over four years, subject to TSX Venture Exchange approval.
- **Large Manitoba Land Package** – The project currently includes two mineral exploration licences totaling 10,600 hectares, with seven additional licences under application covering about 46,500 hectares, creating district-scale exploration potential.
- **Prospective, Underexplored Belt** – Grid says Thompson East combines strong geological potential with limited historical drilling, featuring numerous base and precious

metal occurrences, strong conductors, and similarities to the nearby world-class Thompson Nickel Belt.

- **Exploration Work to Begin Before Drilling** – Initial plans include airborne EM and magnetic surveys, prospecting, sampling, and deep-penetrating ground EM, with a first drilling campaign on top-ranked targets unlikely until later next year.
