

InvestorTalk Alert: Robin Dunbar from Grid Metals Corp. to host on Tuesday, October 6, 2026, at 9:00 AM EST

written by InvestorNews | October 5, 2026

InvestorNews.com is pleased to announce an upcoming InvestorTalk scheduled for tomorrow, Tuesday, October 6, 2026, at 9:00 AM EST, featuring Robin Dunbar, President, CEO, and Director, [Grid Metals Corp.](#) (TSXV: GRDM | OTCQB: MSMGF). To participate in this engaging discussion, please [click here](#)

Grid Metals Corp. is one of Manitoba's largest mineral rights holders, with more than 250,000 hectares of claims and exploration licences. Its current focus is Falcon West, which is advancing toward commercial production following the maiden cesium resource at Lucy South, where the open-pit measured resource totals 51,500 tonnes grading 2.58% Cs₂₀ and 1.47% Li₂₀; Avenir holds a 15% joint venture interest in the property. Grid's Manitoba portfolio also includes Makwa, where Teck can earn up to 70%; Mayville, where Grid owns 89%; Donner, 75%-owned; Thompson East, funded by Boliden; and the 100%-owned Fox River property. Its southeastern Manitoba projects are located on Sagkeeng First Nation ancestral lands under an Exploration Agreement.

In preparation for tomorrow's InvestorTalk, here are some recent news releases from Grid Metals for your review, which are listed below:

- September 30, 2026 – Grid Metals Announces Maiden Cesium

Resource at Falcon West; Establishes Lucy South Cesium Deposit as the World's Second Largest Cesium Resource in Active Development – [click here](#)

- September 28, 2026 – Grid Metals to Participate in Upcoming Investor Conferences – [click here](#)
- September 14, 2026 – Grid Metals Engages ICP Securities Inc. for Automated Market Making Services – [click here](#)
- September 8, 2026 – Grid Metals Announces Positive Mineralogical Results at Falcon West, Engages SGS Canada for Ore Sorting Test Work, and Announces Investor Relations Agreements – [click here](#)

We found the September 30th news release titled, "*Grid Metals Announces Maiden Cesium Resource at Falcon West; Establishes Lucy South Cesium Deposit as the World's Second Largest Cesium Resource in Active Development*" particularly noteworthy and here are 5 key data points from it:

- **Maiden Cesium Resource Established at Lucy South** – Grid reported an open-pit Measured resource of 51,500 tonnes grading 2.58% Cs₂O and 1.47% Li₂O, containing 1,322 tonnes of Cs₂O.
- **High-Grade Pollucite Core Defined** – Within the broader resource, the cesium-rich Pollucite Zone contains 15,600 tonnes grading 5.19% Cs₂O and 1.76% Li₂O, with individual results reaching as high as 30% Cs₂O.
- **Grid Ranks Lucy South No. 2 Globally Among Active Western Developments** – Based on the maiden resource, Grid describes Lucy South as the second-largest cesium resource currently being actively developed by Western-domiciled exploration and development companies.
- **Near-Surface Deposit Remains Open** – The resource averages only about 20 metres below surface, is considered amenable

to conventional open-pit mining and remains partly open to the northeast, southeast and southwest.

- **Commercial Development Work Now Underway** – Grid is advancing environmental studies, First Nations and government engagement, metallurgical and ore-sorting testwork, and permitting preparation, while planning another round of winter drilling for additional cesium occurrences around Lucy South.
