

InvestorTalk Alert: Simon Thibault and Guy Bourassa from Scandium Canada Ltd. to host on Tuesday, August 25, 2026, at 9:00 AM EST

written by InvestorNews | August 24, 2026

InvestorNews.com is pleased to announce an upcoming InvestorTalk scheduled for tomorrow, Tuesday, August 25, 2026, at 9:00 AM EST, featuring Simon Thibault, President & CEO, and Guy Bourassa, Director & Strategic Advisor, [Scandium Canada Ltd.](#) (TSXV: SCD). To participate in this engaging discussion, please [click here](#)

Scandium Canada is a critical advanced materials company developing North America's only vertically integrated primary source of scandium, from its Crater Lake project in Nunavik, Québec, to aluminum-scandium (Al-Sc) alloy products. Through Scalium+, its wholly owned commercialization subsidiary, the Company brings proprietary, patent-pending Al-Sc alloys and the Scalium® line of alloys and technologies to market today, while advancing the Crater Lake mining project for the future. This dual-engine strategy positions Scandium Canada to anchor a secure, resilient North American scandium supply chain and to shape the future of lighter, stronger and longer-lasting materials for advanced manufacturing end users, while committing itself to building a more responsible economy through innovation and agility.

In preparation for tomorrow's InvestorTalk, here are some recent news releases from Scandium Canada for your review, which are

listed below:

- August 24, 2026 – Scandium Canada Appoints Former Critical Materials Leader at General Motors, Simon Thibault, as Next President and CEO – [click here](#)
- August 20, 2026 – Scandium Canada Announces the Large-Scale Commercial Deployment of its Scantium(R) Alloy in Ferreol Skis' Entire 2026-2027 Collection – [click here](#)
- August 20, 2026 – Scandium Canada Announces Closing of \$5 Million Non-Brokered Life Offering of Charity Flow-Through Units – [click here](#)
- August 10, 2026 – Scandium Canada Moves to Grow the TG Zone from 700 to 900 Metres with Resource Extension Drilling Underway at Crater Lake – [click here](#)

We found the August 20th news release titled, "*Scandium Canada Announces the Large-Scale Commercial Deployment of its Scantium(R) Alloy in Ferreol Skis' Entire 2026-2027 Collection*" particularly noteworthy and here are 5 key data points from it:

- **Scantium® Moves Into Full Commercial Use** – Scandium Canada's Scantium® aluminum-scandium alloy is being integrated into every ski in Ferreol Skis' 2026–2027 collection.
- **Thin Alloy Sheets Used Across the Product Line** – Ferreol is using Scantium® in the form of 0.4 mm sheets, making this a high-volume commercial demonstration for Scandium Canada's wholly owned subsidiary, Scantium+.
- **Performance and Durability Benefits Highlighted** – Ferreol says Scantium® improves stability, edge grip, vibration damping, bonding quality, and resistance to deformation in ski construction.
- **Defense Ski Application Included** – Scantium® is also being

used in Ferreol's ski line designed for the defence industry, including mobility applications for extreme and arctic environments.

- **Supports Broader Alloy Qualification Efforts** – Scandium Canada says the Ferreol deployment supports Scantium+'s qualification efforts in other sectors, including aeronautics, automotive, and defence.
