

# InvestorTalk Alert: Stephen Gray from Happy Creek Minerals Ltd. to host on Wednesday, January 7, 2026

written by InvestorNews | January 6, 2026

InvestorNews.com is pleased to announce an upcoming InvestorTalk scheduled for tomorrow, Wednesday, January 7, 2026, at 9:00 AM EST, featuring Stephen Gray, President and CEO, [Happy Creek Minerals Ltd.](#) (TSXV: HPY). To participate in this engaging discussion, please [click here](#)

Happy Creek Minerals Ltd. is focused on making new discoveries and building resources in proximity to infrastructure on the Company's 100-percent-owned portfolio of diversified metals projects in British Columbia. Projects include the high-grade Fox Tungsten deposit, the Silverboss molybdenum-copper-gold-silver project adjacent to Glencore's closed Boss Mountain molybdenum mine and the adjacent Hen-Art-DL gold and silver project. On November 7, 2024, Happy Creek announced the closing of the sale of the Highland Valley Copper Project to Metal Energy Corp. (TSX: V MERG). Happy Creek holds 2,347,220 common shares of Metal Energy. Happy Creek is committed to responsible mineral resource development. The Company's priority is to build and sustain mutually beneficial relationships with Indigenous Communities in the territories in which the Company explores.

In preparation for tomorrow's InvestorTalk, here are some recent news releases from Happy Creek Minerals for your review, which are listed below:

- December 22, 2025 – Happy Creek Grants Stock Options – [click here](#)
- December 17, 2025 – Happy Creek Intercepts 1.18 m of 6.83% W03 from 31.2 m DH Depth at the Fox Tungsten Project in British Columbia – [click here](#)
- November 12, 2025 – Happy Creek Appoints Marketing and Promotion Consultants – [click here](#)

We found the December 17<sup>th</sup> news release titled, “*Happy Creek Intercepts 1.18 m of 6.83% W03 from 31.2 m DH Depth at the Fox Tungsten Project in British Columbia*” particularly noteworthy and here are 5 key data points from it:

- **2025 Drill Program Completed:** Happy Creek Minerals Ltd. completed **18 NQ diamond drill holes totaling ~2,176 metres** at the **Fox Tungsten Project** in British Columbia between **September 5 and October 5, 2025**, targeting resource expansion at the **Ridley Creek (RC)** and **BN** zones.
- **High-Grade Tungsten Intercept at RC Zone:** The standout intercept from the 2025 program was **1.18 metres grading 6.83% W0<sub>3</sub> from 31.2 m downhole depth** in hole **F25-13**, confirming strong grade continuity within the calc-silicate hosted tungsten system.
- **RC Zone Expansion and Continuity Confirmed:** Fourteen holes (1,304.5 m) drilled at the RC Zone demonstrated that the calc-silicate horizon is **continuous westward beneath Deception Mountain** and has been expanded **~250 metres southward**, with mineralization remaining open to the west.
- **BN Zone Shows Stacked Horizons and Depth Potential:** Four deep holes (871.0 m total; ~218 m average depth) at the BN Zone confirmed **multiple stacked calc-silicate horizons**, including mineralized intersections as deep as **~218 m**, supporting further resource expansion potential to the

northwest and at depth.

▪ **Existing NI 43-101 Resource Base (2018)**

The Fox Tungsten Project hosts a **2018 NI 43-101 resource** consisting of:

- **Indicated:** 582,400 tonnes at **0.826% WO<sub>3</sub>** (RC Zone)
- **Inferred:** 565,400 tonnes at **1.231% WO<sub>3</sub>**, primarily at the BN Zone

The 2025 drilling directly targets expansion beyond these established resource limits.
