- September 10, 2024 – Power Nickel Summer Drilling Program Expands The High Grade Polymetallic Lion Zone by 50% – [click here](#)
- August 19, 2024 – Power Nickel Caps Off Impressive Lion Zone Winter Drilling Program with CuEq Results of Holes 50 and 60 Ranging from 1.23% to 7.36% – [click here](#)
- August 13, 2024 – Power Nickel Provides Exploration Update – [click here](#)

5-Data Points from Power Nickel's most recent news release titled, *Power Nickel Summer Drilling Program Expands The High Grade Polymetallic Lion Zone by 50%*:

1. **Expansion of Lion Zone:** The summer drilling program has expanded the high-grade Lion Zone by 50%, with drilling revealing both lateral and vertical growth, including an additional 150m in vertical depth.
2. **Drilling Results:** Out of 12 drill holes, 10 have intercepted sulphide mineralization, suggesting high-grade polymetallic content and extending the zone's reach to 350m laterally and 450m vertically.
3. **New High-Grade Zones Identified:** Three key areas were tested in this program, including a west boundary where the zone is thicker and more massive, opening new opportunities for richer mineral deposits.
4. **Aggressive Winter Program:** Power Nickel is gearing up for a fully funded 30,000-meter winter drill program that could uncover even more extensive mineralization.
5. **Commercial Potential:** The discovery of a shallower westward plunging chute in the Lion Zone could reduce future drilling and operational costs, supporting the company's goal of developing a world-class polymetallic deposit.
