InvestorTalk Alert: Will Rascan from Rockland Resources Ltd. to host on Wednesday, June 25, 2025 at 4:05 PM EST

written by InvestorNews | June 24, 2025

InvestorNews.com is pleased to announce an upcoming InvestorTalk scheduled for tomorrow, Wednesday, June 25th, at 4:05 PM EST, featuring Will Rascan, President and Director of Rockland Resources Ltd. (CSE: RKL | OTCQB: BERLF | FSE: GB2). To participate in this engaging discussion, please click here

Rockland Resources Ltd. is advancing critical minerals exploration and is specializing in beryllium at its strategically located Meteor, Beryllium Butte and Claybank projects in the Spor Mountain region of Utah, USA. Spor Mountain is home to Materion's (NYSE: MTRN) Spor Mountain Mine, the largest beryllium producer in the world and continuously mined since 1969. The Company also has the 100%-owned Cole Gold Mines Project, located in the western portion of the prolific Red Lake gold district of Ontario.

In preparation for tomorrow's InvestorTalk, here are the five most recent news releases from Rockland Resources for your review, which are listed below:

- June 18, 2025 – Rockland Resources Financing Fully Subscribed – click here
- June 17, 2025 – Rockland Resources Arranges Financing – click here

- May 15, 2025 – Rockland Resources Announce Appointment Of Taylor Sulik To Advisory Board – click here
- April 22, 2025 – Rockland Resources Begins Trading on OTCQB (BERLF) and Frankfurt Exchange (GB2) – click here
- April 17, 2025 – Rockland Expands Critical Minerals Position with New Beryllium and Tungsten Claims at Meteor Project in Utah – click here

Here are 5 key data points from their April 17th news release titled, "*Rockland Expands Critical Minerals Position with New Beryllium and Tungsten Claims at Meteor Project in Utah*":

- **New Acquisition:** Rockland Resources Ltd. has acquired the Meteor Beryllium and Tungsten Project in Juab County, Utah, comprising 28 unpatented mining claims covering 525.2 acres, including several historical mines such as East Apex, Hornet, and East Trout Creek.
- **Historical Production and Grades:** The East Apex Mine reported historical beryllium grades up to 2.42% BeO, while the Hornet Mine previously produced 60 tons of tungsten ore averaging 2.0% WO_3. Other prospects also showed beryllium and tungsten mineralization.
- **Strategic Importance:** The project enhances Rockland's beryllium portfolio and adds tungsten at a time when China controls 83% of global tungsten supply and has restricted exports to the U.S. since February 2025.
- **Alignment with U.S. Policy:** The acquisition aligns with President Trump's executive order to strengthen U.S. critical mineral supply chains, particularly for defense and industrial applications.
- **Exploration Plans:** Rockland plans a field program involving geological mapping, geochemical sampling, ground geophysics, and permitting for drill testing through the

Bureau of Land Management.
