

Jack Lifton and Peter Cashin talk about the scandium market and Imperial's strategic opportunity in the vital lightweighting space

written by InvestorNews | August 5, 2020

In an interview with [Technology Metals Show](#) host Jack Lifton, President and CEO of [Imperial Mining Group Ltd.](#) (TSXV: IPG) Peter Cashin discusses the scandium market and the economics of the Crater Lake Project. Peter explains how Imperial Mining's Crater Lake Project provides a strategic opportunity for an exciting new line of lightweighting products. The project also contains rare earths.

"How it (Crater Lake Project) stands out is that it is a primary bedrock opportunity in Quebec," said Mr. Cashin, Imperial's President and CEO. "The grades are exceptionally high relative to our peers for a bedrock deposit. It is exposed at surface so it would be amenable to an open pit operation. Our preliminary metallurgy shows that we have very strong recoveries and high rejection rates of the gangue minerals from our metallurgical work so far. We are ideally located very close to the aluminum capital of Canada."
