

# Jack Lifton Hosts USA Rare Earth's Pini Althaus and Vital Metals' Geoff Atkins on Critical Minerals Corner

written by InvestorNews | June 11, 2021

***Don't miss this exclusive discussion between leading industry experts on the increasingly vital role Critical Minerals play in future technologies and what opportunities it holds for investors for more than a decade on Friday, June 18, 2021.***

**Toronto, June 11, 2021** – InvestorIntel.com, 'the stock source' for investors in the capital markets, is pleased to announce the inaugural presentation of the **Critical Minerals Corner** series with industry expert Jack Lifton to be held on Friday, June 18th from 9 AM to 10:15 AM EST.

**Critical Minerals Corner** is part of the highly successful InvestorTalk.com series which allows investors and analysts to listen and ask questions direct to industry leaders racing to acquire and produce these materials critical to our future.

In this first event, Jack Lifton will feature guests Pini Althaus from USA Rare Earth, LLC and Geoff Atkins from Vital Metals Ltd. (ASX: VML). After introducing their companies, Jack Lifton will moderate a 30-minute discussion for investors on who

will likely be first to production of rare earths in North America. This will be followed by a live 30-minute Q&A from the audience.

Jack Lifton commented in preparation for **Critical Minerals Corner**: “The US domestic markets use some 12,000 tons per year of rare earth permanent magnet enabled components. Nearly all of which are made in China. To decouple the US magnet market from China will require the reconstruction of a number of companies in each stage of the total domestic rare earth permanent magnet supply chain. Producing mines, chemical processors capable of separating mixed rare earths into individual rare earths; specialized metallurgical concerns capable of turning rare earth chemicals into metals and magnet alloys; and last, but not least, magnet fabricators must be organized and put into production. No one company can do this at the levels required even for the US military. There will be dozens of companies involved. Do not, for a minute, believe that any one venture could supply the nation’s needs for rare earth permanent magnets.”

USA Rare Earth is a private company earning and acquiring from Texas Mineral Resources Corp. (OTCQB: TMRC) an 80% operating joint venture interest in The Round Top Heavy Rare Earth and Critical Minerals Project located in Hudspeth County, West Texas. Round Top hosts a wide range of critical heavy rare earth elements, high-tech metals, including lithium, zirconium, hafnium, and beryllium.

Vital Metals (ASX: VML) is an explorer and developer with highly prospective mineral projects, focusing on the world-class rare earth Nechalacho project in Canada. It plans to commence production at Nechalacho in 2021 and aims to produce a minimum

5,000 tonnes of contained REO by 2025.

**Critical Minerals Corner** is exclusive to the InvestorTalk.com series and will not be recorded. Registration is CAD\$25 through this link, [click here](https://investortalk.com/upcoming-events/ola/services/critical-materials-corner-hosted-by-jack-lifton-with-guests-pini-althaus-from-usa-rare-earth-llc-and-geoff-atkins-from-vital-metals-ltd-asx-vml?olaT=2021-06-18T13%3A00%3A00.000Z&olaR=2644470) or cut and paste the following URL link to register:
