

Jack Lifton on how the lithium shortage makes the EV dream – a nightmare.

written by InvestorNews | December 19, 2022

In this video, [Critical Minerals Institute](#)'s (CMI) Co-founder and Chairman Jack Lifton talks about the growing lithium demand from the electric vehicle industry. Discussing the current state of domestic American lithium supply, Jack explains why the target outlined by President Biden of 50% electric vehicle sales share in 2030 with 100% domestic content is impossible to achieve.

Speaking on the United States' Inflation Reduction Act, Jack discusses how the automotive industry has failed to accept the problem of an adequate domestic American lithium supply chain. He goes on to say, "If it is not even possible to buy enough lithium to make enough batteries in the United States for half of our own production, what about the rest of the non-Chinese world?"
