

Jack Lifton with Belinda Labatte of Lomiko Metals on Canada's growing EV industry and the competitive advantages of the Quebec graphite industry

written by InvestorNews | March 25, 2022

Jack Lifton interviews CEO and Director Belinda Labatte on an update on [Lomiko Metals Inc.](#) (TSXV: LMR | OTCQB: LMRMF). In this compelling conversation with Jack, Belinda participates in a discussion on not only Canada's vision for the competitive development of an EV supply chain, but the competitive advantages of the Quebec graphite industry.

In this InvestorIntel interview, which may also be viewed on YouTube ([click here to subscribe to the InvestorIntel Channel](#)), Belinda Labatte pointed out the fragility of the present graphite supply chain in North America given that "100% of the processing of graphite occurs in China and about 90% of the material comes from China." Highlighting the huge demand for graphite in Quebec and the rest of North America, Belinda went on to also provide [an update](#) on Lomiko's UL ECOLOGO® certification for mineral exploration to validate Lomiko's responsible business practices.

About Lomiko Metals Inc.

Lomiko Metals has a new vision and a new strategy in new energy.

Lomiko represents a company with purpose: a people-first company where we can manifest a world of abundant renewable energy with Canadian and Quebec critical minerals for a solution in North America. Our goal is to create a new energy future in Canada where we will grow the critical minerals workforce, become a valued partner and neighbour with the communities in which we operate, and provide a secure and responsibly sourced supply of critical minerals.

The Company holds a 100% interest in its La Loutre graphite development in southern Quebec. The La Loutre project site is located within the Kitigan Zibi Anishinabeg (KZA) First Nations territory. The KZA First Nations are part of the Algonquin Nation and the KZA territory is situated within the Outaouais and Laurentides regions. Located 180 kilometres northwest of Montreal, the property consists of 1 large, continuous block with 48 minerals claims totaling 2,867 hectares (28.7km²). Lomiko Metals published a [Preliminary Economic Assessment \(“PEA”\) on September 10, 2021](#) which indicated the project had a 15-year mine life producing per year 100,000 tonnes of the graphite concentrate at 95%Cg or a total of 1.5Mt of the graphite concentrate. This report was prepared as National Instrument 43-101 Technical Report for Lomiko Metals Inc. by Ausenco Engineering Canada Inc., Hemmera Envirochem Inc., Moose Mountain Technical Services, and Metpro Management Inc., collectively the Report Authors. The Bourier project site is located near Nemaska Lithium and Critical Elements south-east of the Eeyou Istchee James Bay territory in Quebec which consists of 203 claims, for a total ground position of 10,252.20 hectares (102.52 km²), in Canada’s lithium triangle near the James Bay region of Quebec that has historically housed lithium deposits and mineralization trends.
