

Mel Sanderson of American Rare Earths Discusses Two US Rare Earths Projects Accelerating Forward

written by InvestorNews | March 20, 2023

In this InvestorIntel interview during PDAC 2023, Byron W King talks with [American Rare Earths Limited](#)'s (ASX: ARR | OTCQB: ARRF) President of North America Melissa 'Mel' Sanderson about developing two large rare earth deposits in North America. Discussing how key magnetic rare earths such as neodymium and praseodymium comprise 27% of the deposit at their Halleck Creek Rare Earths project in Wyoming, Mel provides an update on their recent [high-grade assay results](#) from the project, with a NI 43-101 resource planned to be released by the end of March or early April and a PEA by the end of the year.

Mel goes on to discuss the upside potential at American Rare Earths' scandium-rich La Paz rare earths deposit in Arizona where they already have a 170.6 million tonnes JORC compliant resource and are planning to grow the resource through additional drilling. Providing an update on their US Government funded R&D partnerships with the Lawrence Livermore National Laboratory and other university research partners, Mel discusses how American Rare Earths is leading the way to cleaner, greener processing and separation technologies for rare earths.

About American Rare Earths Limited

One of the only ASX-listed companies with exposure to the rapidly expanding US market, American Rare Earths is developing its 100% owned magnet metals projects, La Paz in Arizona, and Halleck Creek in Wyoming. Both have the potential to be among the largest, rare earths deposits in North America. The company is concurrently evaluating other exploration opportunities while collaborating with US Government supported R&D to develop a sustainable domestic supply chain for the renewable future.
