

Robert Stewart of Geophysx Jamaica on Copper, Rare Earths and Gold Discoveries

written by InvestorNews | March 28, 2023

In this InvestorIntel interview during PDAC 2023, Peter Clausi talks with Robert Stewart, Founder and Managing Director of [Geophysx Jamaica Ltd.](#) about its gold-copper porphyry and rare earths discoveries in Jamaica. Robert tells Peter how in the past five years Geophysx Jamaica conducted almost 40,000 assays across the island better known for tourism than mining, and secured licenses for about 4,000 square kilometres.

Exploration and additions to the company's database are ongoing, he says in this exclusive interview, with 44 drill holes completed to date and new drilling now underway on a copper-gold porphyry in the east end of the island. Robert explains that in addition to gold-copper discoveries, the company has also identified an unexpected hundred square kilometer rare earths anomaly in the west end of the island.

About Geophysx Jamaica Ltd.

Geophysx Jamaica is an exploration junior searching locally for greenfield mineral discoveries, focused on Copper, Gold, and Rare Earth Metals. It is engaged in the most technologically comprehensive campaign in the history of the country. In a little over 5 years, the company has covered most of the island, including over 30,000 geochemical assays to date, and thousands

of line kilometers of airborne geophysics. It has employed local graduate geologists into exploration teams and brought in expert explorationists from around the world to enhance its expertise. The company is founded and operated on sustainable principles – in how it operates in the local communities, and how it conducts its exploration activities.
