

Russell Fryer on Critical Metals PLC's Strategic Moves in the DRC and Global Expansion Plans

written by InvestorNews | October 12, 2023

In a recent InvestorNews interview, host Brandon Colwell spoke with Russell Fryer, the Executive Director of Critical Metals PLC (LSE: CRTM), about the recent 'transformational' developments in their critical mineral operations in the Democratic Republic of the Congo ("DRC"). In addition to signing an [offtake agreement](#) for a minimum of 20,000 tons of copper oxide ore, Russell said that Critical Minerals has also secured a [hydrometallurgical plant](#) for producing a finished product.

Located less than 100 kilometers from the Molulu project, Russell said that the hydrometallurgical plant has the capacity to produce substantial amounts of copper cathode and cobalt hydroxide. With plans to grow production at the plant, Russell discusses how they are positioned to be a mid-tier player in the metals and mining industry.

Fryer emphasized that controlling downstream production and finished goods is key to competing in the global market. With the new processing capabilities, the company is well-positioned to serve the growing demand for copper cathode and cobalt hydroxide, particularly in the electric vehicle market.

Looking ahead, Critical Metals aims to expand its presence in the copper, cobalt, tantalum, tungsten, and niobium sectors. The company has been actively conducting due diligence on several mines in various countries, with the goal of operating five

mines in five different jurisdictions.

About Critical Metals PLC

Critical Metals PLC has acquired a controlling 100% stake in Madini Occidental Limited, which holds an indirect 70% interest in the Molulu copper/cobalt project, a producing asset in the Katangan Copperbelt in the Democratic Republic of Congo.

The Company will continue to identify future assets that are in line with its stated acquisition objective of low CAPEX and OPEX brown-field projects with near-term production and cash-flow, whilst concentrating on minerals that have strategic importance to future economic growth thereby generating significant value for shareholders.
