

Western Uranium & Vanadium's George Glasier on Gearing up for SMC to Commence Production in Colorado

written by InvestorNews | March 25, 2024

In an engaging interview with Tracy Weslosky of InvestorNews, George Glasier, the President, CEO, and Director of [Western Uranium & Vanadium Corp.](#) (CSE: WUC | OTCQX: WSTRF), provided valuable insights into the company's progress, its role in the uranium and vanadium markets, and its future prospects. Glasier's optimism about the uranium market's recovery is palpable. He stated, "I think we're in a sustained recovery for uranium, and we're ready," highlighting the company's preparation for an upturn in market conditions. This preparation is crucial for the Sunday Mine Complex (SMC), an underground mine situated about 88 kilometers west of Telluride, Colorado: which is on track to achieve full production readiness by 2025.

Glasier also discussed the widening gap between uranium demand and supply, a trend that presents both challenges and opportunities for Western Uranium & Vanadium. Moreover, he delved into the market dynamics of vanadium, the company's coproduct, emphasizing its importance in steel production and the burgeoning technology of vanadium redox flow batteries. The company is not solely focused on ramping up immediate production but is also actively exploring potential acquisitions to broaden its resource base. This strategic vision is supported by the increasing investment interest in the uranium sector, signaling a promising future for the company and its stakeholders.
