Currently, Terra Balcanica holds [100,574,553](#) shares outstanding and has a market capitalization of CAD\$3,520,110.

In preparation for this Wednesday's InvestorTalk, here are the three most recent news releases from Terra Balcanica for your review, which are listed below:

- April 11, 2024 – Terra Balcanica Provides Exploration Activities Update on High Grade Silver and Gold Targets at Viogor Zanik Project in Bosnia – [click here](#)
- April 03, 2024 – Terra Balcanica Executes Letter of Intent For Option Agreement To Acquire 100% Interest In Advanced Saskatchewan Uranium Portfolio – [click here](#)
- January 30, 2024 – Terra Balcanica Intercepts 551 g/t AgEq Over 4.8 m At Cumavici Ridge in Bosnia and Herzegovina – [click here](#)

5-Data Points from the most recent news release on April 11, 2024 – titled, Terra Balcanica Provides Exploration Activities Update on High Grade Silver and Gold Targets at Viogor Zanik Project in Bosnia

1. **Extensive Drilling at Chumavichi:** Terra Balcanica completed approximately 2,200 meters of drilling at the Chumavichi site within the Viogor-Zanik project, focusing on a high-grade silver and polymetallic vein system over a 7.2 km structural corridor.
2. **High-Grade Silver Discoveries:** Significant high-grade silver intercepts at Chumavichi included results like 824.2 g/t AgEq over 4.0 meters, with a peak value of 1,634.4 g/t AgEq over 2.0 meters from a depth of 29 meters.
3. **Exploration at Brezani Target:** At the Brezani target, Terra conducted around 1,200 meters of diamond drilling, discovering a surficial auriferous skarn atop a mineralized structural system with extensive magnetic and EM anomalies.
4. **Strategic Exploration Initiatives:** Terra Balcanica's exploration efforts are part of a broader strategy to define a massive magmatic-hydrothermal system in eastern Bosnia, with indications of its potential highlighted by similar geophysical signatures found at other major projects in the region.
5. **Future Exploration Plans:** Upcoming exploration includes the release of additional assay results from five more drill holes at Brezani and continued exploration to further define and expand the known mineralization zones.
