written by InvestorNews | December 20, 2023

In a recent InvestorNews interview with host Tracy Weslosky, [Stakeholder Gold Corp.](#)'s (TSXV: SRC) President, CEO, and Director Chris Berlet discussed significant [developments](#) at their Ballarat Project located in the White Gold District of the Yukon Territory and an [update](#) on their profitable blue quartzite quarry business in Brazil.

Chris emphasized Ballarat Project's large gold anomalies, extending over a 3.2 kilometer in strike length which is 4-5 times the original footprint of the nearby Golden Saddle Deposit, currently holding a mineral resource of about 1-1.5 million ounces of gold. The absence of arsenic in the Ballarat Project's Skye Zone, makes it a compelling prospect for a substantial and economically viable gold discovery.

Chris also addressed the company's tight share structure, noting that there are currently 13.1 million shares outstanding. Further to this, Chris explains that Stakeholder has a profitable blue quartzite quarry business in Brazil that provides cash flow, allowing them to maintain this exceedingly tight capital market structure.. Chris revealed their ambitious plans to quadruple the scale of this quarry business within the next six months, a move that is expected to significantly bolster the company's cash flow.
