## InvestorTalk Alert: Frank Basa from Nord Precious Metals Mining Inc. to host on Tuesday, July 8, 2025

written by InvestorNews | July 7, 2025

InvestorNews.com is pleased to announce an upcoming InvestorTalk scheduled for tomorrow, Tuesday, July 8th, at 9:00 AM EST, featuring Frank Basa, CEO and Chairman of Nord Precious Metals Mining Inc. (TSXV: NTH | OTCQB: CCWOF). To participate in this engaging discussion, please click here

Nord Precious Metals Mining Inc. operates the only permitted high-grade milling facility in Ontario's historic Cobalt Camp, uniquely positioned to integrate high-grade silver discovery with strategic metals recovery. Its flagship Castle property spans 63 sq. km and includes the Castle Mine and Castle East, where Inferred resources total 7.56 million ounces of silver grading 8,582 g/t Ag. Nord's processing strategy is centered on its proprietary Re-20x hydrometallurgical process, enabling recovery of critical minerals like cobalt, nickel, and NMC materials alongside silver. With infrastructure such as TTL Laboratories and underground access in place, Nord is advancing multi-metal production. It also holds a 35% stake in Coniagas Battery Metals and the St. Denis-Sangster lithium project in Northern Quebec and Ontario.

In preparation for tomorrow's InvestorTalk, here are some recent news releases from Nord Precious Metals for your review, which are listed below:

- July 2, 2025 Nord Precious Metals Crews Complete 68th Test Pit at High-Grade Castle Silver Mine, Discover Extensive New Tailings Deposit <a href="click here">click here</a>
- June 23, 2025 Nord Precious Metals Secures MICA Investment to Scale Critical Minerals Production from Tailings <a href="click here">click here</a>
- June 16, 2025 Nord Mobilizes Crews for Pre-Production Tailings Site Development at Castle High-Grade Silver Mine click here

Here are 5 key data points from their July 2<sup>nd</sup> news release titled, "Nord Precious Metals Crews Complete 68th Test Pit at High-Grade Castle Silver Mine, Discover Extensive New Tailings Deposit":

Here are **five key data points** from the Nord Precious Metals news release dated July 2, 2025:

- 1. **New Tailings Discovery**: Field crews have completed 68 test pits around the Castle Silver Mine headframe, revealing extensive historical tailings deposits—many reaching the five-meter excavator depth limit and remaining open to depth, indicating significant unaccounted material.
- 2. Strategic Integration with Re-20x Pilot: The discovery provides immediate feedstock for the MICA-funded 1,000-hour Re-20x technology pilot program at TTL, enabling simultaneous silver recovery and critical metals extraction.
- 3. **Gravity Circuit Ready for Processing**: Nord's test pilot gravity circuit—featuring a Falcon concentrator and gravity spiral—is installed at TTL and will process tailings exclusively. Prior testing on Miller Creek tailings showed silver grades up to 786,809 g/t in gravity concentrates.

- 4. **Permit and Economic Upside**: The company is considering including the newly identified tailings in its upcoming Recovery Permit submission, potentially enhancing the initial project economics through early, low-cost resource utilization.
- 5. Ongoing Exploration and Sampling: Test pit exploration will continue to claim boundaries, with new sampling protocols in place to characterize silver and critical metals content—data that will shape infrastructure planning and operational rollout.
