

InvestorTalk Alert: Kevin Keough from Oreterra Metals Corp. to host on Wednesday, February 11, 2026, at 4:05 PM EST

written by InvestorNews | February 10, 2026

InvestorNews.com is pleased to announce an upcoming InvestorTalk scheduled for tomorrow, Wednesday, **February 11, 2026, at 4:05 PM EST**, featuring **Kevin Keough, CEO and Director, [Oreterra Metals Corp.](#) (TSXV: OTMC)**. To participate in this engaging discussion, please [click here](#)

Oreterra Metals began trading on February 2, 2026 under the ticker OTMC after restructuring the former Romios Gold Resources Inc., driven by management's belief that its wholly owned Trek South porphyry copper-gold prospect in British Columbia's Golden Triangle represents a high-quality new target based on extensive geoscience work. A January 22, 2026 NI 43-101 Technical Report recommends two initial drilling phases during the 2026 field season. Beyond Trek, the Company owns the Kinkaid claims in Nevada's Walker Lane trend with shallow Au-Ag-Cu workings, the historic high-grade Scossa gold mine in the Sleeper trend, and the Lundmark-Akow Lake Au-Cu property near the Musselwhite Mine in Ontario, where drilling has intersected encouraging broad VMS-style mineralization.

In preparation for tomorrow's InvestorTalk, here are some recent news releases from Oreterra Metals for your review, which are listed below:

- February 10, 2026 – Oreterra Announces \$6,000,000 Private Placement to Support First-Ever Drilling of the Trek South Porphyry Copper-Gold Prospect, Golden Triangle, BC – [click here](#)
- February 6, 2026 – Oreterra Announces Engagement of Generation IACP Inc. to Provide Market Making Services and Engagement of Investing News Network to Provide Advertising and Investor Awareness Services – [click here](#)
- January 29, 2026 – Romios to Commence Trading Post Consolidation as Oreterra Metals Corp. Under Ticker OTMC on Monday, February 2, 2026 – [click here](#)
- January 22, 2026 – Romios Announces Completion of NI 43-101 Technical Report for the 100% Owned Trek Property in BC’s Golden Triangle, Including the Drill-Ready Trek South Porphyry Copper-Gold Prospect – [click here](#)

We found the January 22nd news release titled, *“Romios Announces Completion of NI 43-101 Technical Report for the 100% Owned Trek Property in BC’s Golden Triangle, Including the Drill-Ready Trek South Porphyry Copper-Gold Prospect”* particularly noteworthy and here are 5 key data points from it:

- **NI 43-101 Technical Report Completed** – Oreterra completed a NI 43-101 technical report for its 100%-owned Trek Property, supporting plans for the first-ever drilling at the Trek South porphyry copper-gold prospect in 2026.
- **Large-Scale Drill Program Planned** – Phase One proposes 4,650 m across 8 angled core holes targeting coincident magnetic and IP anomalies beneath porphyry-style alteration, with an estimated \$3.6M budget, followed by a potential Phase Two 4,600 m drill program budgeted at \$3.2M.
- **Prime Location Near Major Deposits** – Trek South lies about

7.5 km southeast of the Galore Creek deposits, operated by a Teck–Newmont joint venture, highlighting strong regional porphyry potential.

- **Fully Permitted, First-Ever Drilling** – The Trek South prospect is fully drill-permitted and has never been drilled before, positioning the 2026 program as the project’s initial test of a large-scale porphyry copper-gold target.
- **Broader Exploration Portfolio** – Beyond Trek, the Company holds additional assets including Nevada’s Kinkaid and Scossa former producers and the Lundmark-Akow Lake Au-Cu project in Ontario near the Musselwhite Mine, providing multi-project growth potential.
