written by InvestorNews | January 13, 2026

InvestorNews.com is pleased to announce an upcoming InvestorTalk hosted by Christopher Ecclestone, featuring **Mike England, CEO and Director of Rockland Resources Ltd. (CSE: RKL | OTCQB: BERLF)**, scheduled for **tomorrow, Wednesday, January 14, 2026, at 4:05 PM EST**. To participate in this engaging discussion, please [click here](#)

Rockland Resources is committed to unlocking value through focused mineral exploration and discovery. The company's flagship project is the historic Cole Gold Mines project in the prolific Red Lake district of Ontario. By leveraging geological expertise, disciplined exploration and strategic project development, Rockland Resources aims to deliver meaningful growth and long-term value to its shareholders. Additionally, Rockland has a portfolio of beryllium properties in Utah that it is determining next moves on.

In preparation for tomorrow's InvestorTalk, here are some recent news releases from Rockland Resources for your review, which are listed below:

- January 9, 2026 – Rockland Resources Secures Driller,

Arranges Financing – [click here](#)

- January 8, 2026 – Corporate Update: Rockland Resources Advances Gold Strategy, Repositions Utah Beryllium Assets – [click here](#)
- December 16, 2025 – Rockland Resources Closes Private Placement – [click here](#)

We found the January 8<sup>th</sup> news release titled, “*Corporate Update: Rockland Resources Advances Gold Strategy, Repositions Utah Beryllium Assets*” particularly noteworthy and here are 5 key data points from it:

- **Imminent Drilling at Cole Gold Mines** – Rockland Resources Ltd. is engaging a drill contractor to begin drilling shortly at its 100%-owned flagship Cole Gold Mines project in the Red Lake district, with a planned 2,500 m drill program targeting high-grade shoots.
- **Strong High-Grade Gold Indicators** – The property hosts 30+ mapped gold-bearing veins and 100+ surface occurrences of visible gold, with recent grab samples returning 111 g/t Au and 145 g/t Au, and historic results including 51.5 g/t Au and 64 g/t Ag over 30 cm at Vein 6.
- **Multiple Priority Drill Targets Defined** – Drilling will focus on three areas: (1) high-grade shoots identified through 3D modelling of historic underground workings, (2) a lithological contact 500 m southwest of the mine with 3.7 m of high-grade gold and visible gold, and (3) Vein 6.
- **Mineralization Open at Depth** – Historic drilling demonstrates gold mineralization extending to 320 m vertical depth and remaining open, associated with shear-zone hosted quartz veins in contact with diorite dykes.
- **Strategic Repositioning of Utah Assets** – Rockland will seek earn-in partners for its Utah beryllium assets

(Claybank and Meteor) and has dropped the Beryllium Butte claims following a BLM decision, with refunds of fees and bond expected as the company prioritizes Red Lake gold exploration.
