

InvestorTalk Alert: Peter Clausi from Silver Bullet Mines Corp. to host on Thursday, January 16, 2025

written by InvestorNews | January 15, 2025

Investor.News is pleased to announce an upcoming **InvestorTalk** scheduled for tomorrow, **Thursday, January 16th, at 9 AM EST**, featuring Peter Clausi, Director and VP of Capital Markets at [Silver Bullet Mines Corp.](#) (TSXV: SBMI | OTCQB: SBMCF). To participate in this engaging discussion, please [click here](#)

Silver Bullet Mines Corp. (SBMI) is a silver and copper exploration and development company with projects in the western USA. Their primary focus, the Black Diamond project, covers nearly 5,000 acres in the historic Miami-Globe copper camp on the Richmond Basin, known for its high-grade silver-copper deposits. Despite historical emphasis on larger copper mines in the area, SBMI is optimistic about uncovering substantial untapped high-grade silver. They are also progressing copper exploration at Black Diamond, highlighted by positive soil surveys. Additionally, SBMI manages the Washington mine in Idaho and conducts early-stage explorations in Nevada's Tonopah silver-gold camp, continuously expanding their exploration and potential for value creation.

In preparation for tomorrow's InvestorTalk, here are the four most recent news releases from Silver Bullet Mines for your review, which are listed below:

- January 13, 2025 – Silver Bullet Mines Discovers

Additional High Grade Silver Mineralization at Super Champ Mine (405.4 oz/ton silver) in Arizona – [click here](#)

- January 2, 2025 – Silver Bullet Mines Corp. Announces Successful Financing – [click here](#)
- December 24, 2024 – Silver Bullet Mines Corp. Announces Strategic Financing – [click here](#)
- December 12, 2024 – Silver Bullet Mines Continues to Assay Super Champ in Arizona for High Grade Silver (508.8 oz/ton) – [click here](#)

We found the January 13th news release titled, *“Silver Bullet Mines Discovers Additional High Grade Silver Mineralization at Super Champ Mine (405.4 oz/ton silver) in Arizona”*, particularly noteworthy, and here are 5 key data points from it:

- **High Grade Silver Discovery:** Silver Bullet Mines Corp. has discovered high grade silver float material parallel to the Super Champ Vein in Arizona, suggesting the presence of an additional vein system. The float material was found during surface exploration uphill from the current mining operations.
- **Assay Results:** The float samples processed at the company’s assay facility yielded high silver grades with the following results:
 - Float 1: 274.8 oz/ton
 - Float 2: 243.2 oz/ton
 - Float 3: 166.0 oz/ton
 - Float 4: 219.8 oz/ton
 - Float 5: 405.4 oz/ton
- **Exploration and Development Plans:** The company plans to conduct a detailed exploration of the area, including excavation and a geological field team site visit, to

potentially identify and confirm another vein structure.

- **Current Production and Processing:** The Super Champ Mine is actively shipping mineralized material to SBMI's mill in Globe, Arizona, with over 600 tons at the mine site and more than 1100 tons already at the mill, where it is processed into high-grade silver concentrate.
- **Financial Update:** SBMI closed a second tranche of financing amounting to \$324,500, representing 2,704,167 Units priced at \$0.12 each, consisting of one common share and a full \$0.16 warrant exercisable within a 36-month term without an acceleration clause.
