

InvestorTalk Alert: Tom Wood from Trinity One Metals Ltd. to host on Wednesday, July 29, 2026, at 4:05 PM EST

written by InvestorNews | July 28, 2026

InvestorNews.com is pleased to announce an upcoming InvestorTalk scheduled for tomorrow, Wednesday, July 29, 2026, at 4:05 PM EST, featuring Tom Wood, CEO and Director, [Trinity One Metals Ltd.](#) (TSXV: TOM | OTC: ARJNF | FRA: 5D5). To participate in this engaging discussion, please [click here](#)

Trinity One Metals is a precious and base metals explorer focused on building a portfolio of high growth projects with exposure to some of the world's most in demand metals. The Company's strategy is to acquire and advance assets with strong geological fundamentals, clear catalysts, and the ability to deliver discovery and growth through disciplined modern exploration. The Company owns a 100% interest in the Silver-1 Mine.

In preparation for tomorrow's InvestorTalk, here are some recent news releases from Trinity One Metals for your review, which are listed below:

- July 21, 2026 – Trinity One Metals Identifies Historic High Grade Silver Intercepts at Silver-1 Including 2.60 m at 1,240 g/t Silver – [click here](#)
- July 8, 2026 – Trinity One Metals Provides Project and Corporate Update – [click here](#)
- June 10, 2026 – Trinity One Metals Provides Operations

Update on Silver-1 Mine and Victory Project – [click here](#)

We found the July 21st news release titled, *“Trinity One Metals Identifies Historic High Grade Silver Intercepts at Silver-1 Including 2.60 m at 1,240 g/t Silver”* particularly noteworthy and here are 5 key data points from it:

- **Historic UN Drill Records Recovered** – Trinity One Metals compiled and interpreted six historic diamond drill holes from a 1978 United Nations exploration program at the Silver-1 Mine in Ecuador.
- **High-Grade Silver Hit Below Historic Mining Depth** – Ocashuaico hole SB-18 returned 2.60 m at 1,240 g/t silver, 1.57% lead and 3.08% zinc from 152.15 m downhole, including 0.25 m at 8,002 g/t silver.
- **Multiple Silver-Lead-Zinc Intercepts Identified** – Hole SB-19 returned several mineralized intervals, including 0.50 m at 2,076 g/t silver and 0.15 m at 2,229 g/t silver, with associated lead and zinc values.
- **Mineralization Extends Beyond Reported Mine Depth** – Several intercepts occur at calculated vertical depths greater than the mine’s reported historical maximum depth of approximately 90 m, providing deeper targets for modern exploration.
- **Additional Historic Records Under Review** – Trinity One has also located historic drill logs from the Shunaste sector, where no historical mining is known, and these records are now undergoing verification and geological interpretation.
