

# Peters on how gold plus copper with a drilling advantage equals a Pacific Empire

written by InvestorNews | March 26, 2019

Recently during [PDAC](#) 2019, Brad Peters, President, CEO and Director of [Pacific Empire Minerals Corp.](#) (TSXV: PEMC | OTCQB: PEMSF) shared Pacific Empire's competitive advantage with InvestorIntel's Tracy Weslosky.

Brad said: "Most importantly our competitive advantage is that we can drill. We drill early, we drill often, and we do it for roughly \$25-35 a meter. It took us a few months to get into that range but now that we are there, we are comfortable with that and we base our 2019 exploration season around the achievements we made in terms of productivity and efficiency in 2018. What we will be doing in 2019 is focusing on our Babine Copper-Gold Porphyry District projects which are four projects in Bulkley region. Totaling just over 17,000 hectares and in that area, we have a 100 day drill program initially planned for 2019."

Pacific Empire Minerals Corp. is an exploration company based in Vancouver, British Columbia, that employs a "hybrid prospect generator" business model and trades on the TSX Venture Exchange under the symbol PEMC and on the OTCQB Markets under the symbol PEMSF.

By integrating the project generator business model with low-cost reverse circulation drilling, the company intends to leverage its portfolio by identifying, and focusing on, the highest quality projects for partnerships and advancement.
