

Peter Clausi Discusses Silver Bullet Mines' Commencement of Commercial Production and High-Grade Results

written by InvestorNews | September 27, 2024

September 27, 2024 – In a recent interview with Investor.News host Tracy Hughes, Peter Clausi, Director and VP of Capital Markets at [Silver Bullet Mines Corp.](#) (TSXV: SBMI | OTCQB: SBMCF), discussed the company's latest milestone: the [commencement](#) of commercial production of high-grade mineralized material. Clausi shared insights into how Silver Bullet Mines (SBMI) transitioned from processing its own material to third-party material, noting that a recent safety inspection by the Mining Safety and Health Administration led to temporary shutdowns. Rather than sitting idle, SBMI took the opportunity to secure third-party material, and this shift has resulted in promising outcomes. "Today's press release is one of the results of that effort," Clausi said.

SBMI's recent due diligence on the third-party material yielded impressive results. "The highest [assay] was 45 1/2 oz per ton," Clausi highlighted, referring to their latest 500-pound sampling program, which far exceeds the industry standard for bonanza silver. The company's 100%-owned modular mill in Globe, Arizona, has been successfully processing this material, and Clausi emphasized that SBMI's ability to process various regional materials without needing significant changes to its circuits is a major advantage. The company plans to ramp up production from 50 tons per day to higher volumes, with Clausi noting, "The mill can get up to 125 tons a day." SBMI's capacity to produce both

dore bars and high-grade concentrate positions the company for sustained revenue generation.

About Silver Bullet Mines Corp.

Silver Bullet Mines Corp. (SBMI) is making headway in the gold and silver production industry. SBMI recently revealed a third potential revenue stream through a partnership to process around 900 pounds of high-grade gold concentrate at its Globe, Arizona facility, benefiting from its advanced gravity circuit. Besides this, SBMI's primary operations focus on silver extraction from the Buckeye Silver Mine and silver/gold production at its Washington Mine in Idaho, to be processed at its fully operational mill. The company recently reported promising high-grade silver findings from the Treasure Room and is working on a financing strategy for its operations. An ambitious goal is to stabilize the Treasure Room for deeper exploration. Another highlight was the successful interception of a mineral-rich zone at the Buckeye Mine, known as "Zone1," believed to contain higher-grade silver. The company plans to continue mining this vein and refine the material at its Globe mill. Recent developments position SBMI as a leading player in silver mining, suggesting a bright future for the company and its investors.
