

Peter Clausi on Silver Bullet Mines Breakthrough High-Grade Silver and the Path to Production

written by InvestorNews | December 12, 2023

In an engaging InvestorNews interview, Peter Clausi, Director and VP of Capital Markets at [Silver Bullet Mines Corp.](#) (TSXV: SBMI | OTCQB: SBMCF), shared his excitement about the company's latest strides in mining exploration as per an [announcement](#) made earlier this week. In this news release they were able to "...confirm the high grade nature of Zone1 and its recovery rates, and to confirm the mill's ability to process a large amount of material from Zone1. Processing was successful on all counts."

Clausi begins by explaining that this week's news release is a culmination of the last 3-year's work. Adding that Silver Bullet Mines has achieved significant progress, especially in Zone One. Clausi proudly discussed the efficient extraction and processing of a 40-ton bulk sample from this area, which resulted in the high-grade silver results announced. This breakthrough signifies a major step towards full-time production and is a boon for the company's shareholders.

During the interview, Clausi delved into the broader impact of these developments for investors and the company at large. He acknowledged that while Silver Bullet Mines is still on the path to generating cash flow, the potential for doing so is on the horizon. Clausi underscored that the company's valuation is currently influenced by its news releases, goodwill, and commitments to its stakeholders. The forthcoming production of Dore bars, a salable silver product, symbolizes a critical shift

towards production and sales, with promising implications for the company's stock value.

Clausi also illuminated the technical side of their operations, including a demonstration of the company's Shaker table. This innovative technique is employed for separating denser elements like silver, successfully yielding high-grade silver. With the promising results obtained and an extensive vein yet to be mined, Clausi emphasized their commitment to ramping up production. The imminent goal for Silver Bullet Mines, as he highlighted, is the production of Dore bars. This significant step, poised to happen shortly, marks an essential milestone in the company's journey towards becoming a key player in the international silver market.

About Silver Bullet Mines Corp.

Silver Bullet Mines Corp. (SBMI) is making headway in the gold and silver production industry. SBMI recently revealed a third potential revenue stream through a partnership to process around 900 pounds of high-grade gold concentrate at its Globe, Arizona facility, benefiting from its advanced gravity circuit. Besides this, SBMI's primary operations focus on silver extraction from the Buckeye Silver Mine and silver/gold production at its Washington Mine in Idaho, to be processed at its fully operational mill. The company recently reported promising high-grade silver findings from the Treasure Room and is working on a financing strategy for its operations. An ambitious goal is to stabilize the Treasure Room for deeper exploration. Another highlight was the successful interception of a mineral-rich zone

at the Buckeye Mine, known as “Zone1,” believed to contain higher-grade silver. The company plans to continue mining this vein and refine the material at its Globe mill. Recent developments position SBMI as a leading player in silver mining, suggesting a bright future for the company and its investors.
