

# Romios Gold with huge potential exploration upside trades on a tiny market cap of C\$10M

written by InvestorNews | January 20, 2022

[Romios Gold Resources Inc.](#) (TSXV: RG | OTCQB: RMI0F) (Romios) is a junior precious and base metals explorer with a lot going on, all in North America. Romios' properties are prospective for gold, silver, copper, cobalt, and molybdenum. Romios' Golden Triangle properties have gold-copper porphyry style mineralization and are located in a region known for some spectacular successes.

The [Golden Triangle region](#) is known for having some very large discoveries and mines such as the Galore Creek Project (M&I resource of 9.3 million ounces of gold, 150 million ounces of silver and 5.1 million tonnes of copper), Eskay Creek-Au-Ag deposit, Brucejack Au mine ([produces 311,000 Oz Au pa](#), acquired recently by Newcrest buying Pretivm for [\\$3.5 billion](#)) and the Red Chris Cu-Au mine.

So yes, the Golden Triangle is a BIG deal location for gold explorers.

**Canada's Golden Triangle is famous for large gold discoveries and mines – Galore Creek, Eskay Creek, Brucejack and Red Chris**

Source: [Romios Gold Resources website](#)

Romios' properties by location include:

- **Golden Triangle (British Columbia, Canada)** (flagship region with [79,789 ha](#)) – Trek, JW, Newmont Lake (under option to Enduro Metals Corp.), Royce/Porc.
- **Ontario (Canada)** – Lundmark-Akow Lake, Timmins Hislop Gold Project.
- **Quebec (Canada)** – La Corne Molybdenum Project.
- **Nevada (USA)** – Scossa Gold Project.

## **Romios' Golden Triangle potential**

Some exciting news [announced](#) by Romios back on November 22, 2021, which it would seem the market has not fully digested. The news concerned the Trek South Property and [stated](#):

“Romios outlines a new >1 km wide porphyry-style Cu-Au-Ag system on its Trek South Property in the Golden Triangle, B.C. The program has partially delineated a **>1 km wide zone of porphyry-style alteration and veinlet-hosted Copper-Gold-Silver** (Cu-Au-Ag) mineralization. As a result, Trek South is now a high priority target for geophysical surveys and diamond drilling in 2022 along with the Company's previously identified Trek North copper-gold porphyry zone which returned impressive drill intercepts including **131 m grading 0.6% Cu, 0.39 g/t Au and 8.5 g/t Ag** in past campaigns ([See Press Release – October 22, 2008](#)).....The Trek South target is 3 km SSW of Trek North and may lie along the same structural corridor as reflected by the nearby Trek Fault and a series of intervening Cu-Au-Ag prospects (See Map 1).”

The above news means the Trek Property (Trek North & Trek South) is shaping up to be a potential game-changer for Romios if they can prove up a significant size copper-gold-silver resource.

**Romios Gold Resources' properties in Canada's Golden Triangle (shown in red) including Trek North and Trek South, JW, Newmont Lake (optioned to Enduro)**

## **Romios acquires silver-copper prospects in Nevada**

In other recent news, Romios [announced](#) that it “has acquired 109 claims over numerous historic gold-silver-copper prospects in the Kinkaid area of Mineral County, Nevada.”

## **Closing remarks**

Romios has recently successfully [raised capital](#) (and [received 4 million shares of Enduro Metals](#) pursuant to Newmont Lake Option Agreement) to further their exploration efforts, especially in the prolific region of Canada’s Golden Triangle. In 2022, Romios plans to do geophysics and [further drilling](#) at Trek North and Trek South.

For investors looking at a gold junior with huge potential exploration upside then don’t go past Romios Gold Resources. It trades on a tiny market cap of [~C\\$10 million](#) and is exploring in a proven billion dollar region with several exciting 100% owned properties as well as the optioned out property at Newmont Lake. I have not even had time to discuss their exciting Ontario projects including at the well known Timmins region.

Investors will need plenty of patience and expect some stock dilution along the way, as finding significant gold is not easy.

One of the most exciting junior gold companies out there. Let’s see if they hit it big in 2022.
