Silver Bullet Mines' Peter Clausi on preparing to trade and the race to production

written by InvestorNews | July 19, 2021

In a recent InvestorIntel interview, Tracy Weslosky speaks with Peter Clausi, VP Capital Markets of Silver Bullet Mines Inc. (TSXV: SBMI) about the near-term silver production potential at Silver Bullet Mines' high-grade silver deposits in Arizona, USA.

In this InvestorIntel interview, which may also be viewed on YouTube (click here to subscribe to the InvestorIntel Channel), Peter went on to say that Silver Bullet Mines has a portfolio of five past-producing silver mines and has received conditional approval to list on the TSX Venture Exchange. With a cashed-up treasury post successful oversubscribed financing and one of its projects expected to be in production in Q4 of this year, Peter said that Silver Bullet Mines may be able to put other projects in operation without having to go to the market for financing.

About Silver Bullet Mines Inc.

Silver Bullet Mines Inc. is a silver and copper exploration and development company with projects in the western USA. Their flagship project is the Black Diamond, close to 5,000 acres in the Miami-Globe copper camp and centered on the Richmond Basin. The basin is the site of the original 1870s native silver discoveries that brought prospectors to the now significant Globe copper camp. The story goes that a scouting party was fired upon by Apache Indians using bullets made of hammered native silver. Thus inspiring the company name – Silver Bullet

Mines. The Richmond Basin is the location of several historic high grade silver-copper mines including: McMorris, La Plata, Helena, Silver Sevens, Buckeye and numerous associated prospects. Little work or extraction came from this area since the early 20th century as the camp focused on big copper mines. But these mine anchor this section of what is called the Arizona Silver Belt that extends from the famous Silver King near Superior, AZ and parallels the trend of the major copper deposits including the Magma mine. They believe the high grade silver is still there waiting for discovery.
