

# InvestorTalk Alert: Brian Leeners from Homerun Resources Inc. to host on Thursday, June 25, 2026, at 9:00 AM EST

written by InvestorNews | June 24, 2026

InvestorNews.com is pleased to announce an upcoming InvestorTalk scheduled for tomorrow, Thursday, June 25, 2026, at 9:00 AM EST, featuring Brian Leeners, CEO and Director, [Homerun Resources Inc.](#) (TSXV: HMR | OTCQB: HMRFF). To participate in this engaging discussion, please [click here](#)

Homerun is building a silica-powered platform across high-purity silica and advanced silica materials, solar, energy storage, and energy solutions. Anchored by a high-purity, low-iron silica resource in Bahia, Brazil's Silica Valley, the company is transforming raw silica sand into materials, products, and technologies for clean energy and advanced technology applications. Its silica business focuses on secure supply and processing for solar glass and advanced materials. Its solar strategy includes developing the first dedicated 1,000 tonne-per-day high-efficiency solar glass plant in the Americas and commercializing extra-clear, antimony-free solar glass. Homerun is also advancing silica-based thermal storage and AI-enabled energy management, control systems, and turnkey electrification solutions for commercial and industrial customers.

In preparation for tomorrow's InvestorTalk, here are some recent news releases from Homerun Resources for your review, which are listed below:

- June 8, 2026 – Homerun Resources Inc. Completes CAPEX Budget for the 3N Primary Silica Sand Purification Plant – [click here](#)
- June 4, 2026 – Homerun Resources Inc. Delivery of First Order of High-Purity Industrial Silica Sand from Santa Maria Eterna Under Distribution Agreement with Cristal Sand Group – [click here](#)
- May 28, 2026 – Homerun Resources Inc. Advances Phase 2 of Its Three-Phase Purification Platform – [click here](#)

We found the June 08<sup>th</sup> news release titled, “*Homerun Resources Inc. Completes CAPEX Budget for the 3N Primary Silica Sand Purification Plant*” particularly noteworthy and here are 5 key data points from it:

- **CAPEX Completed for 3N Silica Plant** – Homerun completed the capital cost estimate for its planned 350,000 tonnes-per-year 3N industrial-grade silica sand processing plant at the Santa Maria Eterna industrial hub in Bahia, Brazil.
- **Phase 1 of Integrated Purification Platform** – The plant represents Phase 1 of Homerun’s three-phase purification platform, designed to turn SME high-purity silica into industrial and advanced materials products.
- **50 Tonnes Per Hour Output** – The facility is designed to process approximately 50 tonnes per hour of raw high-purity, low-iron silica sand into clean, uniform 3N industrial-grade silica.
- **Feedstock for Solar Glass and Future Purification** – The 3N output is intended for solar glass manufacturing, industrial customers, and as feedstock for future 4N and 5N purification circuits.
- **Engineering Scope Defined** – The preliminary engineering package includes process flow design, a 9-hectare plant

footprint, storage and dispatch systems, major equipment input, and a 52-metre diameter storage dome.
