Neo Performance Materials and Uranium Sector Leads this Week-in-Review….

written by Tracy Hughes | August 29, 2022

> *"US Futures are down across the board, with no new economic data or major earnings expected. Investors are looking to the August jobs report, scheduled for Friday, as they weigh up how big a rate hike could be coming from the Fed in September.*
>
> *Last week saw equity markets close the last week on a down note, as all three major U.S. indexes sold off sharply for their worst closes in months after Federal Reserve Chairman Jerome Powell said the central bank would continue fighting inflation with rate increases. Don't expect much in the way of a reprieve in early trading as we get the day under way." –* ***Kevin Thomsen, Morning Chatter*** *for August 29, 2022*

Friday was an intense day of speculation and discussion in the rare earths sector. With breaking news early AM with Agreement to acquire strategic shareholding in Neo Performance Materials and cornerstone investment in Hastings by Wyloo Metals, Christopher Ecclestone put out a piece on InvestorIntel titled Neo Performance and Hastings – Will Wonders Never Cease? – that was followed later that day, with a second announcement Neo Performance Materials Announces $67.5 Million Bought Deal Treasury Offering of Common Shares.

Allow me to remind you that Constantine Karayannopoulos will be the luncheon speaker at the Critical Minerals Institute's summit scheduled for Wednesday, November 9, 2022.

This morning, we see indicators that the uranium sector has

interest, we coincidentally have a headline story written by Jack Lifton titled Are we slaves to Russian uranium processing? It seems we are in the right place at the right time as we start out the InvestorTalk.com schedule this week with 2 uranium companies… followed by an antimony story on Thursday.
