

American Tungsten Advances Zero Level Rehabilitation at IMA Mine

written by Raj Shah | August 20, 2025

August 20, 2025 ([Source](#)) – American Tungsten Corp. (CSE:TUNG) (OTCQB:DEMRF) (FSE:RK9) (“American Tungsten” or the “Company”) American Tungsten is pleased to report significant progress in the ongoing rehabilitation of the Zero Level portal at its IMA Mine site, as part of its commitment to safety, operational excellence, and regulatory compliance.

Weekly Progress Highlights (Week Ending August 16, 2025):

- Completed installation and lagging of the Zero Level portal entrance
- Retimbered and reinforced approximately 10 feet of the access tunnel
- Final leveling and installation of safety berms on the portal pad
- Finalized preparations to meet MSHA compliance requirements

Upcoming Work:

- Continued re-support and rehabilitation of the Zero Level access drift
- Removal of the obsolete surface water tank located below the portal

“We are proud of the steady progress at IMA Mine’s Zero Level

portal. Our team is focused on safety, compliance, and laying the groundwork for future underground operations. These upgrades are essential to ensuring a secure and efficient work environment. As we move forward, we remain committed to investing in the infrastructure and technology that will support long-term exploration and production. The dedication shown by our crews on-site reflects the values we hold as a company—resilience, responsibility, and a forward-looking approach to sustainable production of a critical resource,” said Ali Haji, CEO of American Tungsten.

About the IMA Mine Project:

The IMA Mine is an advanced, readily-permittable, past producing tungsten-molybdenum property situated in the Idaho porphyry belt on private-patented mining claims. American Tungsten has an immediate opportunity to restore production at a strong identified silver and molybdenum-bearing intrusion target in the favourable jurisdiction of Idaho.

ABOUT AMERICAN TUNGSTEN CORP.

American Tungsten Corp. is a Canadian exploration company focused on high-potential tungsten and magnetite assets in North America. The Company is advancing the Ima Mine Project in Idaho to commercial production, addressing critical metal scarcity in North America. The Company's Ima Mine Project is a historic and high-quality underground tungsten past-producing property on private-patented land well above the water table with significant infrastructure. The Company holds an exclusive option to acquire full ownership (subject to a 2% royalty) and has expanded its land position with 113 additional federal claims covering nearly 2,000 acres.
