written by Raj Shah | October 16, 2026

October 16, 2026 ([Source](#)) – Antimony Resources Corp. (CSE: ATMY) (OTCQB: ATMYF) (FSE: K8J0) (the “**Company**” or “**ATMY**”) is pleased to announce the Company has closed its order book of the non-brokered private placement financing under the Listed Issuer Financing Exemption (as defined below), whereby the Company intends to raise up to \$3,000,000 through an offering of up to 10,000,000 units of the Company (the “**Units**”) to be priced at \$0.30 per Unit (the “**Offering**”). The securities offered under the Listed Issuer Financing Exemption will not be subject to a hold period in accordance with applicable Canadian securities laws.

The Offering has been fully subscribed with one strategic mining investor.

Each Unit will consist of one common share in the capital of the Company (each, a “**Common Share**”) and one-half of one Common Share purchase warrant (each whole warrant, a “**Warrant**”). Each Warrant will entitle the holder thereof to purchase one Common Share of the Company at an exercise price of \$0.50 per Common Share for a period of two years following the completion of the Offering.

The Company intends to use the net proceeds of the Offering to fund exploration and development activities on its Bald Hill Antimony Project, as well as for general working capital

purposes. Finder's fees may be payable in accordance with the policies of the Canadian Securities Exchange.

The Offering is scheduled to close on or about October 21, 2026, and is subject to certain conditions including, but not limited to, the receipt of all necessary approvals. Subject to compliance with applicable regulatory requirements and in accordance with National Instrument 45-106 – *Prospectus Exemptions* (“**NI 45-106**”), the Offering is being made to purchasers resident in Canada, except Quebec, pursuant to the listed issuer financing exemption under Part 5A of NI 45-106 (the “**Listed Issuer Financing Exemption**”). The securities offered under the Listed Issuer Financing Exemption will not be subject to a hold period in accordance with applicable Canadian securities laws.

There is an offering document related to this Offering that can be accessed under the Company's profile on SEDAR+ at www.sedarplus.ca and on the Company's website at <https://antimonyresources.ca/>. Prospective investors should read this offering document before making an investment decision.

Bald Hill Antimony Project – A Project with Significant Antimony Potential

Highlights

- Bald Hill is a well-known, high-grade antimony deposit in southern New Brunswick, Canada.
- Assays indicate that Bald Hill is the highest-grade antimony deposit in North America with mineable grades and widths indicated by drilling.
- Drilling has outlined an antimony deposit in the Main Zone over 600 meters long and to a depth of at least 350 meters. The mineralization is open in all directions.

- Widths of mineralization average 4 to 5 meters and grades average 3% to 4% antimony.
- **NI-43-101 Technical Report:** The estimated potential quantity and grade of the drilled area from the 2025 Technical Report, which is the target of our exploration, is reported in the Technical Reports approximately 2.7 million tonnes with a grade between 3% and 4% antimony¹. **For more details on the Potential of the project as described by the author of the Technical Report please consult the NI43-101 which has been filed on SEDAR.** *Antimony Resources Corp. has not completed enough work to confirm this estimate. The potential quantity and grade are conceptual in nature as there has been insufficient exploration to define a mineral resource, and it is uncertain if further exploration will result in the target being delineated as a mineral resource.*
- Potential to expand based on recently discovered targets and additional claims added to the property to the west, south and east.
- New Zones outlined by Soil Sampling approximately 3 kilometres south of the Main Zone on the newly acquired Second Run Claim.
