

Appia Rare Earths & Uranium Corp. to Present at the “John Tumazos Very Independent Research Conference” on December 9, 2025

written by Raj Shah | December 4, 2025

December 4, 2025 ([Source](#)) – Appia Rare Earths & Uranium Corp. (CSE: API) (OTCQB: APAAF) (FSE: A0I0) (MUN: A0I0) (BER: A0I0) (the “Company” or “Appia”) is pleased to announce that it will be presenting at the *John Tumazos Very Independent Research Virtual Conference* on **Monday, December 9, 2025 at 9:45 AM EST.**

The Company’s presentation will provide an overview of Appia’s ongoing exploration activities, recent technical results, and forward strategy. Key discussion points will include:

- Continued progress at the **PCH Ionic Adsorption Clay** and **Carbonatitic Mineralization Property** in Brazil.
- Update regarding the status of the **Elliot Lake Uranium and Rare Earths Project**.
- 2026 drilling and exploration programs at the **Alces Lake Rare Earth Elements** and **Otherside Uranium Properties** in Saskatchewan.

This presentation comes at a timely moment as Appia’s partner, **Ultra Rare Earth Inc.**, is advancing the PCH Project towards its next major milestones through the fully funded **USD \$6 million exploration program**, and as Appia prepares for a renewed exploration push across its Canadian assets in 2026.

Attendees can expect an in-depth look at several key developments that have the potential to shape the Company's growth over the coming year.

Investors, analysts, and interested stakeholders are invited to attend the live webinar.

Registration is now open at:

<https://register.gotowebinar.com/register/1720500847749684570>

A replay of the presentation will be made available following the event on both the conference platform and Appia's website: <https://appiareu.com/>. Further technical details about Appia and its properties can be obtained by contacting Tom Drivas directly at (416) 876-3957 or tdrivas@appiareu.com.

About Appia Rare Earths & Uranium Corp.

Appia is a publicly traded Canadian company in the rare earth element and uranium sectors. The Company holds a 25% interest in the PCH Ionic Adsorption Clay Project, which is 42,932.24 ha. in size and located within the state of Goiás in Brazil.

The Company is also focusing on delineating high-grade critical rare earth elements and gallium on the Alces Lake property and exploring for high-grade uranium in the prolific Athabasca Basin on its Otherside, Loranger, North Wollaston, and Eastside properties. The Company holds the surface rights to exploration for 94,982.39 hectares (234,706.59 acres) in Saskatchewan. The Company also has a 100% interest in 13,008 hectares (32,143 acres), with rare earth elements and uranium deposits over five mineralized zones in the Elliot Lake Camp, Ontario.

Appia has 194.4 million common shares outstanding, 206.8 million shares fully diluted.
